SPECIFICATIONS

Cabinet - Cabinets are all metal, inside and out. The top and bottom are made of galvanized steel. In addition, all seams are closed and sealed, with metal edges turned away from the exposed surface. The result is an integrated structural frame. Internal corners are covered to conform to NSF standards. Automatic interior lighting is controlled by a light switch concealed in the door hinge, except glass door models employ a manual switch.

Doors - Constructed of metal, refrigerator doors are self-closing and fully insulated. Their cam-lift hinges are chrome-plated and self-lubricating. Hinges also have a safety stop that holds the door open, preventing overwring. Chrome-plated gull handles have built-in cylinder locks. The full-perimeter, magnetic vinyl gaskets are removable without the use of tools. Doors easily lift off, and door perimeters have a built-in, low wattage, and anti-condensate heater. Door openings are protected by an impact-resistant, nonconduc-

tive PVC breaker strip with no exposed screws or fasteners.

Insulation - Cabinet body, doors, and evaporator coil housings are filled with pressure-injected polyurethane foam.

Interior Shelves - Three wire shelves per section are standard. Shelves have a runner spaced 1/4 inch O.C. with two reinforcing bars @ 1/2 inch O.C. Coated with 7 mils of baked-on gray epoxy. The shelves have a saline spray corrosion resistance of 600 hours. Shelves will support 250 pounds each with maximum cabinet load of 800 lbs. They are supported on stainless steel pilasters, and are adjustable on 1 inch centers. All these shelves are interchangeable and can be adjusted without tools or special parts.

Self-Contained Refrigeration - The complete refrigeration assembly is mounted on top of the cabinet behind a removable hatch cover.

Refrigeration components include a hermetically sealed compressor, thermostatic expansion valve, thermostatic temperature control, high-humidity coated evaporator coil and hot gas condensate evaporator. The system is balanced to maintain 38°F average internal air temperature. Windrunner gradient air displacement process provides even air flow and temperature control throughout the cabinet. All components are factory installed and tested, and supplied with an attached cord and plug (self-contained), 115 volt only less than 16 amps, master power switch, and exterior digital thermometer.

Remote Cabinets - Standard remote units are provided with capped refrigeration lines, expansion valve, solenoid valve, electric condensate evaporator, and temperature control. Condensing unit is not included. All other features are the same as self-contained units, except power cord.
