

CASE STUDY: Conifer Corp.

By Steven L. McShane, Curtin University (Australia) and University of Victoria (Canada);
and David Lebeter

Conifer Corp. is a sawmill operation in Oregon that is owned by a major forest products company but operates independently of the parent company. It was built 30 years ago and completely updated with new machinery five years ago. Conifer receives raw logs from the area for cutting and planning into building-grade lumber, mostly 2-by-4 and 2-by-6 pieces of standard lengths. Higher-grade logs leave Conifer's sawmill department in finished form and are sent directly to the packaging department. The remaining 40 percent of sawmill output are cuts from lower-grade logs, requiring further work by the planning department. Page 242

Conifer has 1 general manager, 16 supervisors and support staff, and 180 unionized employees. The unionized employees are paid an hourly rate specified in the collective agreement, whereas management and support staff are paid a monthly salary. The mill is divided into six operating departments: boom, sawmill, planer, packaging, shipping, and maintenance. The sawmill, boom, and packaging departments operate a morning shift starting at 6:00 a.m. and an afternoon shift starting at 2:00 p.m. Employees in these departments rotate shifts every two weeks. The planer and shipping departments operate only morning shifts. Maintenance employees work the night shift (starting at 10:00 p.m.).

Each department, except for packaging, has a supervisor on every work shift. The planer supervisor is responsible for the packaging department on the morning shift, and the sawmill supervisor is responsible for the packaging department on the afternoon shift. However, the packaging operation is housed in a separate building from the other departments, so supervisors seldom visit the packaging department. This is particularly true for the afternoon shift, because the sawmill supervisor is the furthest distance from
