

## HEART RATES

Bradycardia = rate of <60 bpm, a slow heartbeat

Normal = rate of 60-100 bpm, a normal heart rhythm

Tachycardia = rate of >100-160 bpm, a fast heartbeat

How to Count Atrial and Ventricular Rate using the 6 Second Rule:

### Atrial Rate

1. Identify the P-waves.
2. Beginning at the first P-wave start counting 30 large squares.
3. Then count how many P-waves are between the 30 large squares.
4. Take that number and multiple it by 10 and this is your heart rate.

### Ventricular Rate

1. Identify the R-waves.
2. Beginning at the first R-wave start counting 30 large squares.
3. Then count how many r-waves are between the 30 large squares.
4. Take that number and multiple it by 10 and this is your heart rate.

## Chest Leads

In summary, the 12 standard leads are: V1, V2, V3, V4, V5, V6, RA, RL, LA, LL.

Limb leads - Frontal view of heart

I, from the right arm (-) toward the left arm (+)

II, from the right arm toward the left leg

III, from the left arm toward the left leg

(Taken together, these three forms the classic "Einthoven's triangle")

aVR, augmented lead toward the right arm

aVL, augmented lead toward the left (arm)

aVF, augmented lead toward the foot

(Note: aVR is approximately opposite of I and should essentially mirror the shape of I vertically)

### Frontal view of heart

### Limb Leads
