

## Differences between the NSC Mathematics exam and the MAT tests

- One difference between the MAT tests and the NSC Mathematics papers is that questions in the MAT tests do not cue the writers in any way.
- No indication is given (for example by the fact that a question occurs in Paper 1 or in Paper 2) as to whether a question should be dealt with using geometrical or algebraic reasoning, by applying trigonometric principles, or by a combination of these. The fact that mathematics often requires learners to integrate many different skills and concepts in any given problem means that individual questions will assess across a range of mathematical competencies. For example, a question dealing with the graphical representation of a function may also assess spatial and algebraic competence. This means that writers must have a deep understanding of mathematics, and know what reasoning is appropriate in a given context; they will need these skills in Higher Education.

## Principles for preparation and proactive teaching

### *Dealing with multiple choice questions*

Unless multiple choice questions are used in the classroom, it might be helpful to give learners some guidelines regarding how to deal with tests in this format. The best way to tackle multiple choice questions in a mathematics paper is the following:

- Read the question very carefully without looking at any of the possible options.
- Try to work out the question before looking at any of the possible options.
- Look at the options and see whether one of them corresponds to the answer that has been obtained, in which case select that option. **But** be critical of the reasoning involved, in case the answer reflects a specific misconception, as in the following example:

$$\sqrt{9x^2 + 16x^2} \text{ is equal to } \quad (\text{A}) \ 5x \quad (\text{B}) \ 7x \quad (\text{C}) \ \pm 5x \quad (\text{D}) \ \pm 7x$$

Working out the question before looking at the answers, and being aware of the misconceptions that (a) the square root of a sum is not equal to the sum of the square roots, and (b) 'square root' is by definition positive, should help writers make the correct choice.

- If none of the answers corresponds to the answer that has been found, start the question over, and try once more. If none of the options is then found, leave the question for later and move on. All questions have one correct option – this has been checked beforehand, and writers need not worry that there may be a mistake in the question.

**Preparing Teachers for a Changing World** Linda Darling-Hammond, John Bransford, 2012-07-12 Based on rapid advances in what is known about how people learn and how to teach effectively this important book examines the core concepts and central pedagogies that should be at the heart of any teacher education program Stemming from the results of a commission sponsored by the National Academy of Education Preparing Teachers for a Changing World recommends the creation of an informed teacher education curriculum with the common elements that represent state of the art standards for the profession Written for teacher educators in both traditional and alternative programs university and school system leaders teachers staff development professionals researchers and educational policymakers the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom Preparing Teachers for a Changing World recommends that in addition to strong subject matter knowledge all new teachers have a basic understanding of how people learn and develop as well as how children acquire and use language which is the currency of education In addition the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students needs the demands of the content and the social purposes of education in teaching specific subject matter to diverse students in managing the classroom assessing student performance and using technology in the classroom

Technology and Assessment Michael Russell, 2006-02-01 Together the words technology and assessment have different meaning for different people Those who work with educational or instructional technology take these words to mean assessing the impacts of technology on teaching and learning Test developers and psychometricians however consider ways in which computer based technologies can be used to enhance current approaches to student

assessment This book examines technology and assessment from both perspectives by examining past current and promising methodologies and applications in both fields The influences instructional uses of technology and the increasing reliance on testing to gauge student and school performance have on one another are also explored The book concludes by describing an organizational structure that could bring instructional applications of technology and assessment practices into closer alignment

Handbook of Response to Intervention and Multi-Tiered Systems of Support Paige C. Pullen, Michael J. Kennedy, 2018-10-04 Of the many issues facing special education and general education today it is difficult to imagine one more important or timely than response to intervention RTI Almost overnight RTI has become standard practice across the nation Unfortunately RTI remains ill defined falls far short of its evidence based practice goal is almost invariably misused and often results in more harm than good Nevertheless as a conceptual framework RTI has great potential for ensuring that students with disabilities receive appropriate evidence based instruction The mission of this handbook is to present a comprehensive and integrated discussion of response to intervention RTI and its relation to multi tiered systems of support MTSS in both special education and general education Although the two terms are currently used interchangeably distinct differences exist between them Therefore chapters are dedicated to distinguishing the two concepts RTI and MTSS and describing each one s unique role in both general and special education In addition the authors recommend a third term Multi Tiered Instruction to differentiate the practices related to the purpose of the specific intervention
