Entrepreneurship N4 Examination Paper:

Entrepreneurial Wage Dynamics in the Knowledge Economy Adam K. Korobow, 2012-12-06 The role that small firms and entrepreneurship play in economic development has been particularly contentious Joseph Schumpeter 1911 in his early work argued that through a process of creative destruction small and new firms would serve as agents of change and a catalyst for innovation and growth But he later rescinded this view instead concluding that large corporations were the engines of growth Just as it seemed that a consensus had emerged among scholars and policy makers that small business was at best superfluous and at worst a drag on growth and economic development David Birch provided evidence that in fact small firms were the engines of job creation The early skepticism of challenge to Birch's findings revolved around methodology and measurement However a wave of subsequent studies by different authors spanning different time periods sectors and even countries generally confirmed Birch's original findings for most developed countries and in most time periods small business has provided most of the job creation *Current Index to Journals in Education*, 2002 [Collections V3 N4 & V4 N1](#) Collections, 2016-05-06 Collections A Journal for Museum and Archives Professionals is a multi disciplinary peer reviewed journal dedicated to the discussion of all aspects of handling preserving researching and organizing collections Curators archivists collections managers preparators registrars educators students and others contribute
