

I Shall Protect the Forests

by Lenore Hetrick

Have you ever really looked at trees,
And seen their perfect beauty?
If you have, you know that their protection
Is a stern and sacred duty.
Protection of that spreading grandeur,
Through many summers grown,
Safeguarding of those temples green
Where the song of bird is known.

Then remember that the forest fire
Is an enemy to fight.
It is a tree assassin to be
Watched both day and night.
A camp fire left unguarded or
A match tossed carelessly
May bring destruction with great loss,
And deepest tragedy.

When next you see the wide-flung branches
Of a graceful pine,
Think to yourself, "A sacred service
Is part and parcel of mine.
I resolve to protect all trees forever,
And guard their heaven-sent beauty,
To save the forests of our land
Shall ever be my duty."

The Voice of Nature in Ted Hughes's Writing for Children Lorraine Kerslake,2018-06-12 Despite the fame Ted Hughes s poetry has achieved there has been surprisingly little critical writing on his children s literature This book identifies the importance of Hughes s children s writing from an ecocritical perspective and argues that the healing function that Hughes ascribes to nature in his children s literature is closely linked to the development of his own sense of environmental responsibility This book will be the first sustained examination of Hughes s greening in relation to his writing for children providing a detailed reading of Hughes s children s literature through his poetry prose and drama as well as his critical essays and letters In addition it also explores how Hughes s children s writing is a window to the poet s own emotional struggles as well as his environmental consciousness and concern to reconnect a society that has become alienated from nature This book will be of great interest to not only those studying Ted Hughes but also students and scholars of environment and literature ecocriticism children s literature and twentieth century literature

Nature & Future Wilson Amooro,2015-06-05 Praise Report Wow I am blown away The heart of each child shines through The depth and magnitude of the poetry is felt I marvel in the fact that so many of our youth appreciate and care about the environment and speak so highly of her Through their powerful intelligent and descriptive words inspiration too is felt I love how so many suggest solutions and offer ways or help I finished the poetry feeling refreshed and inspired by our new generation of future leaders environmentalist and citizens of the world Zakiya Penny Founder Director Sabayet Inc Nature and Future is an uplifting piece of work full of hope for our planet It is most inspiring because it was written by children who are placing an inter generational call for action today to shift power towards tomorrow I call these kids nature s future They are demanding a clean and green future in the most creative manner It corrects the philosophical mistake which assumes that mankind is separate from our ecological system so we should subdue use and destroy it They rather call for preservation and conservation from both present and future generations The children demonstrate a clear understanding of the principle of Ubuntu respect for one s self respect for others and respect for the

environment I highly recommend it to everybody especially children and young people who represent the hope expressed in the pages of this ecological beauty of poetry that choose people over profit and ecosystem over economics Gideon Commey Climate Reality Leader Ghana Youth Environmental Movement GYEM

scholarship on children's literature displays a wide variety of interests in classic and contemporary children's books. While environmental and ecological concerns have led to an interest in ecocriticism, as yet there is little on the significance of the ecological imagination and experience to both the authors and readers young and old of these texts. This edited collection brings together a set of original international research-based chapters to explore the role of children's literature in learning about environments and places with a focus on how children's literature may inform and enrich our imagination, experiences, and responses to environmental challenges and injustice. Contributions from Australia, Canada, USA, and UK explore the diverse ways in which children's literature can provide what are arguably some of the first and possibly most formative engagements that some children might have with nature. Chapters examine classic and new storybooks, mythic tales, and image-based and/or written texts read at home, in school, and in the field. Contributors focus on exploring how children's literature mediates and informs our imagination and understandings of diverse environments and places and how it might open our eyes and lives to other presences, understandings, and priorities through stories, their telling, and re-telling, and their analysis. This book was originally published as a special issue of *Environmental Education Research*. *Teaching Kids to Care & Cooperate* Kathy Pike, Jean Mumper, Alice Fiske, 2000. J. L. Gili's selection of Lorca's poems in Spanish with his own unassuming prose versions as guides to the originals first appeared in 1960. With its excellent introduction and selection, it remains a perfect introductory guide to the great poet. The book is ideal for newcomers to Lorca who know or are prepared to grapple with a little Spanish. It influenced a generation of readers and poets, including Ted Hughes, who first encountered Lorca through this book. Spain's most celebrated modern poet, Federico García Lorca, was born in 1898 near Granada. Poet, dramatist, musician, and artist, he was the author of *The Gypsy Ballad Book* (1928) and *Poet in New York* (1940). After his return from New York and Cuba to Republican Spain in 1930, he devoted himself to the theatre, writing three tragedies, including *Blood Wedding* (1933). An outspoken supporter of the Republic, he was assassinated at the height of his fame by Nationalist partisans in Granada in 1936, on the eve of the Spanish Civil War.

Greening the Children of God Chad Michael Rimmer, 2021-01-01. *Greening the Children of God* uncovers the theological roots of the growing ethical imperative to reconnect children to their natural environment. In their different traditions, theologians, environmental educators, and psychologists all affirm that knowing their place in the natural environment helps a child develop an intersubjective ecological identity that nurtures virtues of mutuality and care. During the Scientific Revolution, this ethical harmony was threatened as science and moral theology began to adopt different epistemological methods. Something the Anglican priest and poet Thomas Traherne was all too aware of: Traherne insisted that education should promote a child's attention to the moral dimensions woven into the tapestry of creation and professed that play, wonder, and a sensory relationship to diverse creatures play a pedagogical role in a child's moral formation. *Greening the Children of God* establishes the contemporary significance of Traherne's moral theory in conversation with child psychologists, educators, philosophers, and theologians who

know that cultivating a place based relationship to the local ecology helps children perceive creation s deep mutuality and develop a moral identity in the image of a caring Creator
