Holistic Bioethics Jude Thaddaeus Buyondo, 2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches

to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn't offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics

Principles of Environmental Economics and Sustainability Ahmed Hussien, 2012-11-12 Recent years have witnessed considerable consolidation between the disciplines of environmental and ecological economics at research level but until now textbooks in the area have done little to reflect this Ahmed Hussien's book is to date the only one to reconcile the two standpoints The central focus of the book will continue to be on this systematic integration of both mainstream and ecological approaches to environmental economics and an acknowledgement that enduring solutions to major contemporary environmental challenges can be obtained through studies based on a well conceived and balanced interdisciplinary approach However this third edition also contains much that is new Chiefly brand new chapters appear covering the following topics The economics of climate change The economics of biodiversity and ecosystem services Green accounting and alternative economic and social indicators of sustainability The business case for environmental sustainability An Appendix that provides a brief historical account of the development of ecological economics The result is a comprehensive introduction to the main facets of environmental and ecological economics a text that boldly refuses to put up barriers between disciplines and takes a holistic approach to vital issues This student friendly textbook contains a variety of study tools including learning points boxed features case studies revision questions and discussion questions and an Appendix that provides students with a review of basic economic principles relevant to the study of the environment and its management Written in a clear and accessible style this book will prove an excellent choice for introducing both students and academics to the world of environmental economics

A Primer on Environmental Sciences Matthew N. O. Sadiku, Uwakwe C. Chukwu, Olaniyi D. Olaleye, 2022-02-09 In a modern society it is easy to forget that our society depends largely on the environmental processes that govern our world Environment refers to an aggregate of surroundings in which living beings such as humans animals and plants live and non living things exist It includes air water land living organisms and materials surrounding us The environment is an important part of our daily lives Environmental issues are now part of every career path and employment area Environmental science is an interdisciplinary field that applies principles from all the known technologies and sciences to study the environment and provide solutions to environmental problems It is the study of how

the earth works and how we can deal with the environmental issues we face There is an ever demanding need for experts in this field because the environment is responsible for making our world beautiful and habitable For this reason environmental science is now being taught at high schools and higher institutions of learning Education on environmental science will empower the youths to take an active role in the world in which they live

Comparative Perspectives on Environmental Policies and Issues Robert A. Dowie, 2014-01-10 Comparative Perspectives on Environmental Policies and Issues presents tools and concepts about environmental policies in several developed and developing countries It explores a broad survey of ecological modernization theory ecological feminism theory environmental justice theory the concept of sustainability and research on environmental policies Data were collected through surveys interviews and focus groups and are used to analyze social economic and environmental impact on people The book specifically discusses how the earth's basic life supporting capital soils forests species fresh water and oceans is degraded or depleted to provide for human needs and how air pollution and acid precipitation are causing widespread injury to humans forests and crops Realistically over taxing of natural resources and ecological systems throughout the world has promoted economic growth and created increasing opportunities for people while also advancing social injustice The use of the environment to accomplish social and economic transformation raises fundamental issues for the study of environmental policy and the natural ecological system As human beings exploit the natural environment to meet present needs they often will destroy resources needed for the future generations Thus environmental policies are enacted to ensure that social and economic impacts of the environment are compatible with the limits of natural systems Offering an intuitive and crystal clear explanation of the key concepts and principles of environmental policies and sustainable development this volume is suitable not only for environmental science students but also for instructors practitioners researchers and academics
