Development of environmentally friendly products gains an increasing portance in science and in industry While product development was strongly dedicated to achieve quality cost and time targets environmental issues indirectly had always been under consideration by engineers see Fig 1 Furthermore a methodology for the development of environm tally sound products was missing Despite of significant progress in using computer aided tools for product development and design environmental aspects were attended Computer aided tools typically do not include methods for considering environmental issues enabling the designer to sess a product s environmental effects Fig 1 Vision of Environment as a key target for product development v vi Preface Product related environmental issues are getting more and more political and public awareness Development of environmentally friendly products has become an action item for both politics and industry UNFCCC 1997 Energy consumption is on the agenda and covers pollution and resource saving Typical topics of directives of the European Union are waste noise air pollution water nature and biodiversity soil protection civil protection and climate change After the translation into national law the development of environmentally friendly products is a basic approach to contribute to the fulfilment of the topics mentioned above In the European Community a Communication from the Commission to the Council and the European Parliament on Integrated Product Policy was adopted on th 18 June 2003 EC 2003

Eco-friendly Products for Sustainable Environment Development Dr. Devidas N. Patil ,Dr. Rakesh R. Jadhav ,Dr. Apurba Saikia ,Mr. Chandan Das ,2022-09-26 Every other day we read new about a fossil recently found that shows us the traces of our ancestors We being humans and creatures of this world have always left traces of us behind But traces of this and previous century are not what we should leave for our future generations Because this plastic waste these holes in ozone will endanger the lives of people and there will be extremely bad consequences Nonrenewable energy sources are causing pollution around the world and are adding to entropy Plastic will not degrade for coming thousands of years and we are basically synthesizing things that is beyond natures ability to decompose easily All this calls for production of material that does the job and is not harmful for our environment During the old times there were no shopping bags People used to carry cloth bags in old days now paper bags are their environment friendly replacement which is not very great idea either since we are cutting down trees for that This book was written keeping in mind all the troubles caused by using products that are harmful for environment and progress of this world toward creating eco friendly products was discussed The idea of creating the products that will protect the environment and make it a better place for current and upcoming generations One of the main problems of using chemical dyes to color the clothes has made its way towards utilizing the dyes that are natural or digital alternatives Tanneries are popular for releasing chemicals and metals that are toxic for other living things and we do not even realize how much plastic waste our single shopping trip produces Fuels produced from renewable sources plastic

bag alternatives and some environmentally friendly items help people save money Energy saving appliances minimize energy and utility costs while using fewer natural resources Currently most businesses prefer employing eco friendly resources to make items rather than conventional ones in order to protect the environment In addition to the fact that global warming has gotten worse since the turn of the century many businesses have started producing eco friendly goods When choosing to manufacture items some businesspeople find it quite challenging to create a sustainable atmosphere Because the business will be under pressure to develop new technologies to produce a product that is both dependable and environmentally friendly This book will give you a ride of the replacements of products harmful for environment and how their better alternatives are helping the environment get back on track

Towards Green Hydrogen Generation Mehmet Sankir, Nurdan Demirci Sankir, 2024-10-01. Readers will find a multidisciplinary approach elucidating all the important features of green hydrogen so that science researchers and energy engineers as well as those in economics, political science and international relations will also find value. Energy sources and generation is the foremost concern of all governments, NGOs and activist groups. With Green New Deals and reduced or net zero emission goals being implemented on a global scale, the quest for economic, scalable, efficient and sustainable energy systems has reached a fever pitch. No one energy source ticks all the boxes and new energy technologies are being developed all the time as potential disruptors. Enter green hydrogen with zero emissions. Hydrogen is a rare gas in nature and is often found together with natural gas. While hydrogen is the most abundant element in the known universe, molecular hydrogen is very rare in nature and needs to be produced and produced in large quantities if we are serious about the Green Deal. This book has been organized into three parts to introduce and discuss these crucial topics. Part I discusses the Green Deal and the current state and challenges encountered in the industrialization of green hydrogen production as well as related politics. Chapters in this section include how to decarbonize the energy industry with green hydrogen and one that describes a gradual shift in the approach of hydrogen production technologies from non-renewable to renewable. Part II is devoted to carbon capturing and hydrogen. Chapters on biomass, mass waste to hydrogen conversion and related efficient and sustainable hydrogen storage pathways, life cycle assessment for eco design of biohydrogen factory by microalgae and metal oxide based carbon capture technologies are all addressed in this section. The third and final part of the book was designed to present all features of green hydrogen generation. Chapters include PEM water electrolysis and other electrolyzers, wind driven hydrogen production and bifunctional electrocatalysts, driven hybrid water splitting are introduced and thoroughly discussed. Audience: This book is directed to researchers and industry professionals in energy engineering, chemistry, physics, materials science and chemical engineering as well as energy policymakers, energy economists and others in the social sciences.

Sustainable Pharmaceutical Product Development and Optimization Processes Bancha Yingngam, Muhammad Shahzad Aslam, A. K. Haghi, 2025-01-30. This book offers unparalleled insight into the convergence of sustainability and pharmaceutical product development with a specific focus on optimization processes. By addressing the urgent demand for more environmentally conscious and efficient strategies in the drug development industry, particularly in an era where the world faces the mounting challenges posed by climate change, the book provides a comprehensive guide for integrating

sustainability principles throughout the pharmaceutical product lifecycle directly contributing to the United Nations Sustainable Development Goals SDGs such as SDG 12 Responsible Consumption and Production and SDG 13 Climate Action The chapters cover key topics including the application of green chemistry eco design principles sustainable sourcing of raw materials waste reduction strategies and the use of renewable energy in pharmaceutical manufacturing processes Throughout the book case studies are integrated offering practical insights and concurrently highlighting the economic and environmental advantages of sustainable practices thereby addressing skepticism regarding the feasibility and profitability of such initiatives The book also discusses regulatory considerations ethical implications and the challenges and opportunities associated with moving toward more sustainable practices in pharmaceutical development Importantly this book seeks to solve the problem of the knowledge gap and lack of practical resources for professionals in the pharmaceutical industry who aspire to implement sustainable and optimized processes This work consolidates a network of professionals and scholars keenly focused on future sustainability challenges developing enhancement methodologies and sharing successful strategies for implementing eco friendly practices in pharmaceutical sectors worldwide ultimately contributing to the global effort to achieve the SDGs by 2030 With a focus on pharmaceutical professionals researchers academicians and students the book serves as a valuable reference for those involved in drug development and process optimization Policymakers and regulatory bodies might also find it insightful as it addresses current landscapes challenges and future directions in sustainable pharmaceutical product development
