Geometry Mary Lee Vivian, 1994 *Circles* Daniel Pedoe, 1995 Illuminates the fundamental aspects of geometry where the circle plays an important role *Circumference and Area of Circles*, 2009 *The Circle* Alfred S. Posamentier, Robert Geretschl ger, 2016 The circle has fascinated mathematicians since ancient times This entertaining book describes in layperson s terms the many intriguing properties of this fundamental shape If math has intimidated you this may be the ideal book to help you appreciate the discipline through one of its most important elements The authors begin with a brief review of the basic properties of the circle and related figures They then show the many ways in which the circle manifests itself in the field of geometry leading to some amazing relationships and truly important geometric theorems In addition they explore remarkable circle constructions and demonstrate how all constructions in geometry that usually require an unmarked straightedge and a compass can also be done with the compass alone Among other things the reader will learn that circles can generate some unusual curves many even quite artistic Finally the role of circles in art and architecture and a discussion of the circle s place on the sphere bring full circle this presentation of a key element of geometry **Circles** David A. Adler, 2016 The characteristics of circles as well as how to find the radius diameter circumference and area of a circle are explained and illustrated in this geometry picture book **Series of Tables of the Area and Circumference of Circles ...** Charles Todd, 1853 *Complements to Classic Topics of Circles Geometry* Ion Patrascu, Florentin Smarandache, We approach several themes of classical geometry of the circle and complete them with some original results showing that not everything in traditional math is revealed and that it still has an open character The topics were chosen according to authors aspiration and attraction as a poet writes lyrics about spring according to his emotions **A Treatise on the Circle and the Sphere** Julian Lowell Coolidge, 1916 *Circles* Mindel Sitomer, Harry Sitomer, 1971 Simple experiments illustrate the concept and characteristics of the circle *A School Geometry* Henry Sinclair Hall, Frederick Haller Stevens, 1904
