Tangents and Secants of Algebraic Varieties F. L. Zak, 1993 The book is devoted to geometry of algebraic varieties in projective spaces Among the objects considered in some detail are tangent and secant varieties Gauss maps dual varieties hyperplane sections projections and varieties of small codimension Emphasis is made on the study of interplay between irregular behavior of higher secant varieties and irregular tangencies to the original variety Classification of varieties with unusual tangential properties yields interesting examples many of which arise as orbits of representations of algebraic groups ABSTRACT **Homework Helpers: Geometry** Carolyn C. Wheeler, 2007-04-25 This new title in the Homework Helpers series will reinforce mathematical foundations and bolster students confidence in geometry The concepts are explained in everyday language before the examples are worked Good habits such as checking your answers after every problem are reinforced There are practice problems throughout the book and the answers to all of the practice problems are included The problems are solved clearly and systematically with step by step instructions provided Particular attention is placed on topics that students traditionally struggle with the most While this book could be used to supplement standard geometry textbooks it could also be used by college students or adult learners to refresh long forgotten concepts and skills Homework Helpers Geometry includes all the topics that are traditionally covered in a high school geometry course including Parallel lines Congruent lines Quadrilaterals and other polygons Similarity and special triangles Right triangle trigonometry Circles Area volume and solids **E-math Iii Tm' 2007 Ed.(geometry)** , Geometry For Dummies Mark Ryan, 2016-07-05 Hit the geometry wall Get up and running with this no nonsense guide Does the thought of geometry make
