A Few of Our Favorite Things Patricia D. Morrell, Kate Popejoy, 2014-11-04 We are all familiar with the expression teachers bag of tricks It is fairly easy for K 12 teachers to do a quick web search scan library shelves and browse through journals to provide them with numerous lessons and ideas to keep their bags filled Science teacher educators need to not only provide preservice teachers with resources to help them fill their bags but also include crucial theory and pedagogy what constitutes minds on lessons not merely hands on activities But where do we science methods instructors find ideas to put in our bag of tricks to help us with the pedagogy we teach and model These kinds of teaching ideas are not so easy to find using the internet or even science methods textbooks This book is a collection of some favorite teaching ideas from science teacher educators from across the United States and abroad This book is NOT a collection of teaching ideas about specific science content This book IS a set of activities that help us prepare our preservice science teachers in the areas of Constructivism Conceptual Change Nature of Science Integration including Technology Integration Scientific Inquiry Engineering Design and Diversity Differentiation Each section starts with a brief overview of the topic and an introduction to the activities included on the theme The individual activities include step by step instructions modifications extensions references and additional readings to help you easily and fully implement the idea in your own classroom These ideas are a few of our favorites we hope they will become some of yours as well

Two Cheers for Higher Education Steven Brint, 2019-01-08 A leading expert challenges the prevailing gloomy outlook on higher education with solid evidence of its successes Crushing student debt rapidly eroding state funding faculty embroiled in speech controversies a higher education market disrupted by online competition today's headlines suggest that universities power to advance knowledge and shape American society is rapidly declining But Steven Brint a renowned analyst of academic institutions has tracked numerous trends demonstrating their vitality After a recent period that witnessed soaring student enrollment and ample research funding universities he argues are in a better position than ever before Focusing on the years 1980 2015 Brint details the trajectory of American universities which was influenced by evolving standards of disciplinary professionalism market driven partnerships especially with scientific and technological

innovators outside the academy and the goal of social inclusion. Conflicts arose: academic entrepreneurs, for example, flouted their campus responsibilities and departments faced backlash over the hiring of scholars with nontraditional research agendas. Nevertheless, educators' commitments to technological innovation and social diversity prevailed and created a new dynamism. Brint documents these successes along with the challenges that result from rapid change. Today, knowledge-driven industries generate almost half of U.S. GDP, but divisions by educational level split the American political order. Students flock increasingly to fields connected to the power centers of American life and steer away from the liberal arts. And opportunities for economic mobility are expanding even as academic expectations decline. In describing how universities can meet such challenges head-on, especially in improving classroom learning, Brint offers not only a clear-eyed perspective on the current state of American higher education but also a pragmatically optimistic vision for the future.
