The Sense of Power Carl Berger,2013-01-01 Prior to the publication of The Sense of Power most studies of the Canadian movement for imperial unity focused on commercial policy and military and naval cooperation This influential book demonstrated that the movement which held that Canada could only become a great nation within the British Empire was significantly influenced by its leading advocates belief in nationalism Carl Berger explores the emotional appeal and intellectual context of this belief arguing that these advocates support of imperial unity can be grasped only in terms of their commitment to certain conservative values and in relation to their conception of Canada The Sense of Power was commended by the Toronto Star when it was first published as entertaining as well as brilliant and in 2011 Ramsay Cook noted that few first books or for that matter few books have made as marked an impact on the interpretation of a major theme in Canadian history This second edition brings to life the work s incisive analysis and its important contribution to Canadian intellectual history

Hell in the Byzantine World Angeliki Lymberopoulou,2020-09-17 The imagery of Hell the

Christian account of the permanent destinations of the human soul after death has fascinated people over the centuries since the emergence of the Christian faith. These landmark volumes provide the first large scale investigation of this imagery found across the Byzantine and post Byzantine world. Particular emphasis is placed on images from churches across Venetian Crete which are comprehensively collected and published for the first time. Crete was at the centre of artistic production in the late Byzantine world and beyond and its imagery was highly influential on traditions in other regions. The Cretan examples accompany rich comparative material from the wider Mediterranean: Cappadocia, Macedonia, the Peloponnese and Cyprus. The large amount of data presented in this publication highlights Hell's emergence in monumental painting not as a concrete array of images but as a diversified mirroring of social perceptions of sin.

The Ecologies of the Building Envelope

Alejandro Zaera-Polo, Jeffrey Anderson, 2021-05-11. The Ecologies of the Envelope theorizes the building envelope as a literal embodiment of the social, political, technological and economic contingencies which have become embedded within it over the last century, analyzing the historical lineages, heroes and villains that helped define the complex material ecologies we see within the envelope today. While the facade is one of the most thoroughly theorized elements of architecture, it is also one of the most questioned since the end of the 19th century. Within the discipline of architecture, the traditional understanding of the facade focuses primarily on semiotic and compositional operations such as proportional laws and linguistic codes which are deployed on the building's surface. In contrast to this, our material and environmental theory of the envelope proposes that the exponential development of building technologies since the mid 19th century, coupled with new techniques of management and regulation, have diminished the compositional and ornamental capacities of the envelope in favor of material quantitative and technical performances. Rather than producing a stylistic analysis of the facade, we investigate the historical lineages of the performances, components, assembly types and material entanglements that constitute the contemporary building envelope.
