The Milk Soy Protein Intolerance (MSPI) Tamara Field, 2013-12-27 I first heard of Milk Soy Protein Intolerance MSPI in January of 1997 at the office of a Pediatric Gastroenterologist who had just performed a procto sigmoidoscopy and biopsy on my 7 week old son He told me that Max's digestive problem was MSPI and that it would be much easier for me if I stopped breastfeeding now and put him on a special formula Of course at that moment my head was spinning I had finally found out the reason my son had been screaming the first 7 weeks of his life and though I wanted to continue breastfeeding I did not want to cause him anymore pain The Doctor told me that there was a diet I could follow to continue breastfeeding but that it was very difficult to follow Wanting to make the best choice for my son I stopped breast feeding that day and started him on formula In retrospect the physician was right even though I regret that I did not continue breastfeeding with the demands of a new infant and trying to figure out a complicated diet would have been completely overwhelming I knew though that if I had any more children I would try any diet possible in order to breastfeed So during the first few months of my pregnancy with my second son Nate I began preparing for the MSPI diet Determined that I would not lack for good things to eat and that I would find chocolate that was acceptable on this diet I started shopping Little by little I found many alternatives for the food I previously enjoyed the only exception being cheese I found chocolate cake brownies casseroles pasta rice milk rice breads fast food eating out and so much more even a substitute for ice cream It just took a lot of planning and a bit of ingenuity This book is intended for the mother that has just heard her infant has milk soy protein intolerance and to begin the diet right away This will help the mother find food she can eat and thus continue breastfeeding her child

Doomsday Bunker Book Ben Jakob, 2014-11-01 We all have heard of people talking pontificating and preaching about a doomsday or have watched the TV show Doomsday Preppers We have heard people called Preppers or What Ifers People have been talking about some sort of End of the World scenario for decades Even the United States government has many bunkers around the country some of which have been purchased by ordinary citizens preppers Some of us are concerned something may happen sooner rather than later I have heard more and more people talking about the possibility of an imminent disaster Some people worry about different possible scenarios For example economic collapse societal collapse civil unrest electromagnetic pulse weather destruction war fire nuclear attacks terrorist attacks fuel shortages pandemics geomagnetic reversal etc Sixty one percent of Americans believe some sort of doomsday will happen within the next twenty years Sixty percent of Americans believe there will be economic collapse within the next fifteen years Many people are preparing for the scenarios of which they are concerned It is estimated in the United States of America approximately ten percent of the population are preppers to one degree or another No one knows if or when one or more calamities will occur There is no way to predict a specific occurrence or time factor and my crystal ball broke so I

cannot help with your prognostication The best we can do is to prepare for any eventuality This is why I personally and many others believe a concrete bunker is the best idea Some people are planning for an aboveground bunker and some are interested in an underground bunker In this book we are going to be discussing both in great detail As I will explain this type of bunker will give you the best protection possible for the most scenarios One need not be a conspiracy theorist to be apprehensive People may think Domsday preppers or What ifers as we are often called are Nut jobs However when TSHTF we will be the ones who others will come to since we will be the ones who are prepared
