LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: size, color, and shape of the lizards.

Did your lizards grow different than I did?

Yes, because the lizards that I selected were different in size, color, and shape. I also noticed that some lizards were faster than others.

An adaptation is a structure or function that the organism has as a response to its environment. Give an example of an adaptation that you found in the virtual lab.

One example of an adaptation that I found was the ability of some lizards to change color. This is a response to the environment and helps them to hide from predators.

Provide one evolutionary adaptation for why lizards have the ability to change color (i.e., the green) would have evolved a camouflage.

One evolutionary adaptation for why lizards have the ability to change color is that it helps them to hide from predators.
