Hospice and Palliative Nursing Practice Review Barbara G. Volker, 1999 *The Mental Health and Substance Use Workforce for Older Adults* Institute of Medicine, Board on Health Care Services, Committee on the Mental Health Workforce for Geriatric Populations, 2012-10-26 At least 5.6 million to 8 million nearly one in five older adults in America have one or more mental health and substance use conditions which present unique challenges for their care With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030 the aging of America holds profound consequences for the nation For decades policymakers have been warned that the nation's health care workforce is ill equipped to care for a rapidly growing and increasingly diverse population In the specific disciplines of mental health and substance use there have been similar warnings about serious workforce shortages insufficient workforce diversity and lack of basic competence and core knowledge in key areas Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce *The Mental Health and Substance Use Workforce for Older Adults In Whose Hands* assesses the needs of this population and the workforce that serves it The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions says the committee that no single approach nor a few isolated changes in disparate federal agencies or programs can adequately address the issue Overcoming these challenges will require focused and coordinated action by all

Textbook of Palliative Medicine Eduardo Bruera, Irene Higginson, Charles F von Gunten, 2009-01-30 *Textbook of Palliative Medicine* provides an alternative truly international approach to this rapidly growing specialty This textbook fills a niche with its evidence based multi professional approach and global perspective ensured by the international team of editors and contributing authors In the absence of an international curriculum for the study of palliative medicine this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field and the structure and content have been constructed very much with this in mind With an emphasis on providing a service anywhere in the world including the important issue of palliative care in the developing nations *Textbook of Palliative Medicine* offers a genuine alternative to the narrative approach of its competitors and is an ideal complement to them It is essential reading for all palliative care physicians in training and in practice as well as palliative care nurses and other health professionals in the palliative care team *Caring*, 1990 **Transforming Palliative Care in Nursing Homes** Mercedes Bern-Klug, 2010 This volume outlines the belief that nursing homes can and should support the physical psychological and social needs of residents and that residents can thrive in nursing homes when these needs are met The book's contributors explore the role

that palliative or comfort care plays in enhancing the quality of life of nursing home residents as well as the medical familial psychological cultural and financial issues that influence decision making about end of life care The book is designed to be a tool to prepare social workers to advocate for a greater incorporation of palliative care and psychosocial care into the culture of nursing home care The book includes discussions of the psychosocial needs of nursing home residents and families the financing of long term care and end of life care ethical issues in chronic care and end of life trends and characteristics in nursing home care rituals and grief at end of life and considerations for the future Each chapter includes case examples to further illustrate points made
