User-friendly dual banders with independent band controls

Icom technology brings you high performance, full-function handhelds. The IC-W32A and IC-W32E, that meet the demands of both the novice and experienced operator: simple operation and advanced features.

Independent band controls

The W32 series handhelds have separate tuning and volume controls for each band on the top panel. This conveniently allows independent adjustment of either band. And for added versatility Icom introduces the VHF/UHF exchange function. This function allows you to assign VHF/UHF tuning and volume to either knob—set your preferred band to the knob furthest from the antenna for easy access. Of course the frequency display changes in sync with this function.

Simultaneous receive of both bands

Independent main and sub bands allow you to receive both VHF and UHF simultaneously, or use the V/V and U/U functions for receiving 2 frequencies on the same band. Moreover, either operating band can be used in transmit regardless of whether it appears in its "proper" display or not.

200 memory channels with memory name capability

100 memories for each band provide ample storage of most-used frequencies, repeater information, etc. Each channel can be assigned a name of up to 8 alpha characters from the keypad for easy recognition. This memory name function is also available for DTMF memory channels for auto patch dialing convenience.

Handheld-to-handheld cloning capability

Through the use of an optional cloning cable, information such as memory channels, memory names, etc., can easily be transferred from one IC-W32A/E to another. In addition, optional software allows you to clone and edit contents using a computer.

And more...

- A powerful 5 W of output power (with BP-173)
- New guide function provides quick reference to key/switch functions and transceiver operation for easy "on the fly" operation
- Tone encoder and decoder (tone squelch) are standard
- LCD and keypad back-lighting for night operation
- Mic. simple remote control function (Optional RM-75A is required)
- Auto level adjusting squelch or use the manual squelch setting
- Crossband, full duplex capability
- Programmed, full and memory skip scan
- Auto power-OFF function
- Auto repeater function (U.S.A. version only)
- Weather channel receive capability (U.S.A. version only)
- An antenna, battery pack* and battery charger* are included

*Some versions include a battery case instead of these.

The Archaeologist's Manual for Conservation Bradley A. Rodgers, 2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for then non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe
