Proceedings of the 5th Borneo International Conference (BICAME 2024): Symposium on Digital Innovation, Sustainable Design and Planning (DSP) Musyarofah Musyarofah,Samsu Dlukha Nurcholik,M. Ihsan Alfani Putera,Ade Wahyu Yusariarta Putra Parmita,Riza Hadi Saputra,Alfi Suci Dirgantari,Rulliannor Syah Putra,2024-12-23 This book is an open access Sustainability at its core is the ability to meet the needs of the present without compromising the ability of future generations to meet their own needs This principle recognizes the interconnectedness of environmental social and economic systems and seeks to create a harmonious balance among them As our global population expands and resource demands increase the imperative for sustainable development becomes more critical Climate change biodiversity loss and resource depletion are urgent challenges that require innovative and holistic solutions Sustainable futures propose a forward looking approach that considers the long term impact of our actions on the planet and its inhabitants In the pursuit of sustainable futures innovation plays a central role Technological advancements such as those in digitalization and green technology are essential for creating solutions that address environmental challenges while supporting economic and social development Sustainable futures require a holistic integration of policies technologies and societal practices This integration involves collaboration across sectors and disciplines to create synergies that amplify positive impacts and minimize negative consequences Green technology also known as environmental technology or clean technology refers to the development and

application of products processes and services that use renewable materials and energy sources produce minimal waste and emissions and have a reduced impact on the environment compared to traditional technologies The primary goal of green technology is to address environmental challenges and promote sustainability So the focus is on exploring how integrating digitalization and green technology can propel us toward a more sustainable and resilient future For this we need to promote innovative sustainable technologies and ensure equal and universal access to information and financial markets Hence the 5th BICAME 2024 offers a conference with various topics that can be used to showcase the development of knowledge from various fields The presentations run in parallel with the conference We are grateful to the sponsors and exhibitors for their interest and support for the conference *Reconsidering Israel and Judah* Gary N. Knoppers, J. Gordon

McConville, 2000-06-30 The Deuteronomistic or more properly Deuteronomistic History is a modern theoretical construct which holds that the books of Deuteronomy Joshua Judges Samuel and Kings constitute a single work unified by a basic homogeneity in language style and content This construct owes much to the influence of Martin Noth's classic study of the Deuteronomistic History contained in his larger *Überlieferungsgeschichtliche Studien* According to Noth the Deuteronomist incorporated the deuteronomistic law into the beginning of his work framing it with speeches by Moses The Deuteronomist then added other sources such as tales of conquest and settlement prophetic narratives and speeches official annals and records While this larger thesis has stood the test of time there is much disagreement among contemporary scholars about a wide variety of issues The present collection attempts to provide readers with an understanding of the important developments methodologies and points of view in the ongoing debate Both current essays and some older classic essays that have shaped the larger debate are included Ten are newly translated into English Each essay is prefaced by a detailed foreword by one of the editors that summarizes and places the essay in its appropriate context making the volume ideal for use in seminars or courses as well as for individuals wishing to become familiar with the state of discussion on the Deuteronomistic History
