

3.03 Mitochondria: Energy Units Report

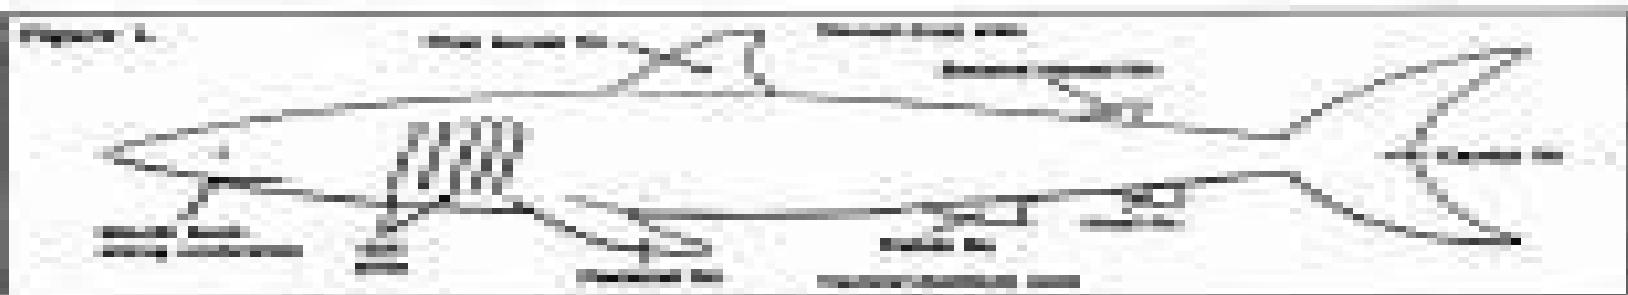

Introduction

- 1. There are diagrams in this lab: page 3 = plant cells, page 4 = the mitochondria, page 5 = the chloroplasts, and page 6 = animal cells (you can print pages 4-6; however, use these pages). **Remember: these are living organisms; you must be careful to print Pages 3-6 prior to lab activities!)**
- 2. Use the pictures of the plant, animal & Figure 3 to help you draw the different energy flow when it necessary. **However, consider energy and this is the direction they are being given.**
- 3. When you draw the cell on page 2 & Figure 3, make sure to identify the nucleus, nucleolus, endoplasmic reticulum, rough & smooth ER, Golgi, lysosomes, and mitochondria.
- 4. **After you have completed the lab, go to the discussion board. Post your assignment. If other students ask a question, share the answer after the question. If the question is follow, share answers to questions 1-3 and follow the discussion.**
- 5. **Comments on this lab also count towards your grade, the more comments on the blog would prove that they know all the material the better the grade.**
- 6. Review the Energy Diagram (in the plant cell on page 3).

Directions: You will be using the following materials from the [Mitochondria: Energy Units Report](#) to complete the lab. Be sure to use the other materials and other items in the lab to help you with this task. **Print out the following documents:**

Materials/Initial setup: Plant Cells

• The above diagram was to help you identify the 40 different parts of the plant cell.
