

EVIDENCES OF EVOLUTION LAB

I. PURPOSE: What are the 6 Evidences of Evolution?

BACKGROUND: Evidence has been found to indicate that living things have changed gradually during their natural history. The studies of fossils as well as embryology, biochemistry, anatomy, geographic distribution and current observations of natural selection provide evidence for evolution.

II. MATERIALS: Copy of Figure 1, copy of Table 1, copy of Table 2, copy of Table 3

III. PROCEDURES:

Attach Figure 1, Table 1 and Table 2 in your Data and Observations section. Then read through each section of the INSTRUCTIONS and complete tables or answer questions as instructed. Record table information in the DATA and OBSERVATIONS section of your lab. After answering questions 1-19, complete Table 3 and attach in the Questions section before completing the Discussion and Conclusion.

INSTRUCTIONS:

SECTION 1 : EVIDENCE FROM COMPARATIVE ANATOMY

By comparing anatomical structures, evolutionary links can be established between groups of organisms. These comparisons include examining Homologous Structures, Analogous Structures and Vestigial Structures.

a. HOMOLOGOUS STRUCTURES

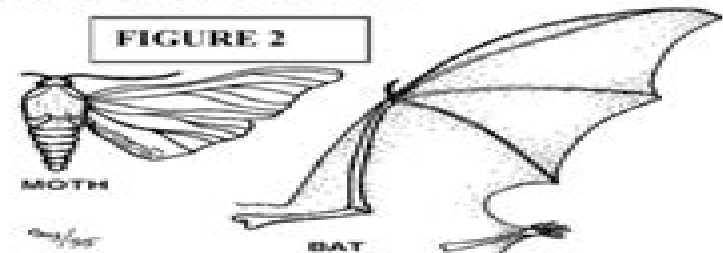

The structures in FIGURE 1 are *formed* in similar ways during embryonic development and share like arrangements: however, they have somewhat different forms and functions. They are called homologous structures.

1. Carefully examine the drawings of the bones in FIGURE 1. Look for *similarities* among among the various animals. **COLOR** each part of the human arm a different color. Color all the bones of the wrist another color and the bones of the phalanges (fingers) yet another color. Then **color** the corresponding bone in each of the other animals the same color as those in the human bone. Attach FIGURE 1 in your Data and Observations Section
2. In Table 1, describe the function of the phalanges (fingers) of each set of bones.
3. Answer questions 1 and 2.

b. ANALOGOUS STRUCTURES

Some apparently unrelated animals have organs with similar function, yet are very different in structure and form. These structures are called analogous structures.

1. Examine FIGURE 2 of the moth wing and the bat wing. Answer questions 3-5.

Everything Ray Comfort, 2009 Richard Dawkins is arguably the modern poster boy for Charles Darwin However a key difference radically separates the two men Darwin believed in the existence of God and calls God the Creator seven times in The Origin of Species Dawkins in contrast claims The more you understand the significance of evolution the more you are pushed towards atheism It seems Professor Dawkins thinks Charles Darwin didn't understand his own theory Just months after the 2009 discovery of the supposed missing link author Ray Comfort turns the tables on evolutionists In Nothing

Created Everything he examines the evidence for evolution and shows it is lacking He demonstrates that when it comes to explaining how life began atheists and evolutionists offer faith not facts Ironically atheists insist nothing created everything a scientific impossibility In a conversational tone Comfort speaks to both atheists and believers and urges this discussion be based on hard evidence And when it is he insists people will realize evolution is a theory that can t be tested or measured and therefore can t be scientific *The Foundations of Behavioral Economic Analysis* Sanjit S. Darwin, God and the Meaning of Life Steve Stewart-Williams, 2010-09-30 If you accept evolutionary theory can you also believe in God Are human beings superior to other animals or is this just a human prejudice Does Darwin have implications for heated issues like euthanasia and animal rights Does evolution tell us the purpose of life or does it imply that life has no ultimate purpose Does evolution tell us what is morally right and wrong or does it imply that ultimately nothing is right or wrong In this fascinating and intriguing book Steve Stewart Williams addresses these and other fundamental philosophical questions raised by evolutionary theory and the exciting new field of evolutionary psychology Drawing on biology psychology and philosophy he argues that Darwinian science supports a view of a godless universe devoid of ultimate purpose or moral structure but that we can still live a good life and a happy life within the confines of this view
