Question 1

Read the following case study and answer all the following questions.

Imagine you are the new HR director of a company involved in the manufacturing of heavy equipment that are used to build roads. Part of your brief as HR Director is to come up with suggestions on how to increase profitability and decrease staff turnover. Your discussions will form part of a strategic planning session that will focus on how to turn the company around. Poor economic circumstances and general mismanagement of staff has led to very little pay increases, and staff turnover is at a record high. The company functions within a strong unionised environment, and you have only been in your new position for one day when you were told in no uncertain terms that “things need to change, or staff will engage in strike action to force the boss’s hand”.

- 1.1. You strongly believe in involving the employees in decisions that affect them. Compile a possible action plan on items to discuss with the unions and staff on matters that need changing. The focus of the initiatives should be employee participation and involvement. **[10]**
- 1.2. Consider how you will approach the unions on these matters as you know from experience that the unions may view these plans with skepticism. You want their buy-in in any new plans and want to assure them that you are not trying to erode their power base. **[10]**
- 1.3. Critically analyse the differences between the “tripartite” and “multipartite” perspectives of the employment relationship. **[10]**
