**The Monthly Packet of Evening Readings for Members of the English Church** , 1867 *Elite Women in English Political Life c.1754-1790* Elaine Chalus, 2005-06-16 Based on wide ranging original research into political personal and general correspondences across a period of significant social and political change this book explores the gendered nature of

politics and political life in eighteenth century England by focusing on the political involvement of female members of the political elite Elaine Chalus challenges the notion that only exceptional women were involved in politics that their participation was necessarily limited and indirect and that their involvement was inevitably declining after the 1784 Westminster Election While exceptional women did exist and gender did condition women's participation the personal social and particularly the familial nature of eighteenth century politics provided more women with a wider variety of opportunities for involvement than ever before Women from politically active families grew up with politics absorbing its rituals and their own involvement extended from politicized socializing up to borough control and election management Their participation was often accepted expected or even demanded depending upon family traditions personal abilities and the demands of political expediency Chalus reveals that although women's involvement in political life was always potentially more problematic than men's given contemporary concerns about the links between sex politics and corruption their participation was largely unproblematic as long as their activities could be explained by recourse to a familial model which depicted their participation as subordinate and supportive of men's It was when they came to be seen as the leading political actors in a cause that they overstepped the mark and became targets of sexualized criticism Contemporary critics worried that politically active women posed a threat to male polity but what actually made them threatening was that they proved that women were not politically incompetent and implicitly demonstrated that gender was not a reason for political exclusion Although the dividing line between acceptable and unacceptable female political behaviours was sharper from the late eighteenth century onward Chalus suggests that women who were willing to work creatively within the familial model could and did remain politically active into and through the nineteenth century
