The authors of the DSM-5 have responded to this criticism by stating that the term "disorder" is used to describe a pattern of behavior that is problematic and causes distress or impairment. They argue that the term is not intended to imply a medical condition, but rather a social construct. The authors also note that the term "disorder" is used in the DSM-5 to describe a wide range of conditions, from mild to severe, and that the term is used in a way that is consistent with the DSM-5's goal of providing a common language for mental health professionals.
