in it an exceedingly interesting chapter on gem cutting But the volume was written about 75 years ago probably had a very limited circulation was never reprinted and not one library in fifty ever heard of it That is the only volume the Author has ever found that treats even briefly of gem cutting This excludes of course such texts as The Gem Cutters Craft by Leopold Cleremont which have chapters on the technique of cutting but that treat of it so generally that they cannot be used as instructions The art for some reason has always been passed down from generation to generation by apprenticeship only When the Author began the above mentioned investigation he was told The cutting of gems can be learned only through an apprenticeship There is no desire here to picture the art as an easy one to learn nor to minimize the skill that is shown by the work of the professional lapidaries nor to intimate that the professional could if he would reveal all his secrets in one brief volume The desire is to lift the cloud of mystery that has always surrounded the operation and show that actually there is nothing mysterious in the practices of the profession but only certain basic rules which if obeyed will bring definite results It is hoped that the instructions herein given are sufficiently explicit that the beginner in the work will have no especial difficulties It is hoped also that they are not so tedious but that they will be readable by those who do not propose to cut gems but who are nevertheless interested in the operation
