Broadcasting & Cable ,1997 **Bacon's TV/cable Directory** ,2006 **Mediaweek** ,1997 **News Media Yellow Book** ,1999 **The Democratic Constitution, 2nd Edition** Neal Devins, Louis Fisher, 2015-10-01 Constitutional law is clearly shaped by judicial actors But who else contributes Scholars in the past have recognized that the legislative branch plays a significant role in determining structural issues such as separation of powers and federalism but stopped there claiming that only courts had the independence and expertise to safeguard individual and minority rights In this

readable and engaging narrative the authors identify the nuts and bolts of the national dialogue and relate succinct examples of how elected officials and the general public often dominate the Supreme Court in defining the Constitution's meaning Making use of case studies on race privacy federalism war powers speech and religion Devins and Fisher demonstrate how elected officials uphold individual rights in such areas as religious liberty and free speech as well as and often better than the courts This fascinating debunking of judicial supremacy argues that nonjudicial contributions to constitutional interpretation make the Constitution more stable more consistent with constitutional principles and more protective of individual and minority rights

Leadership Embodied, 2nd Edition Joseph J Thomas, 2013-10-15 *Leadership* is a most demanding undertaking How do some people make it seem so simple so natural and instinctive In the age old debate as to whether leaders are born or made Thomas contends that the answer is both Great leaders throughout history were born with certain capabilities Preparation honed those capabilities Then that ability and preparation were combined with a will to lead When circumstances demanded

the great leaders of history pulled these attributes together to create results that drove the course of history While leaders are present in every aspect of human undertaking we chose to illustrate each of the components of leadership through the most dramatic and demanding of all human undertakings war and the preparations for war Wartime leaders are leaders writ with a darker pen Wartime challenges are because of the life and death nature of the affair more monumental and exacting In the selection of individuals to illustrate each point we chose wartime leaders as well as those who guided their subordinates and organizations in preparation for combat Further we chose American leaders with a distinct and obvious bias towards the navy and Marine Corps Multiple reasons led us to our approach for Leadership Embodied First a biography is perhaps the most effective method for imparting leadership lessons Simple listings of prescriptive traits or descriptive qualities are patronizing and frequently boring Second our biographical examples are familiar to most or at least they should be Finally all of these historical selections have dramatically shaped today s institutions practices and customs within the naval services These are not marginal figures with marginal influence The individuals included and their respective leadership attributes should be required reading for any student of leadership Each has a particular lesson for midshipmen on their journey to becoming a navy or Marine Corps officer This book does not promise to be a panacea There is no short cut Leadership does not follow a prescribed path We study examples to inspire us to become better to be strong when it is easy to give in and to know others have gone before us and faced insurmountable odds Leadership as an ill defined social science crosses boundaries with several disciplines including sociology psychology philosophy and history We have selected a method that combines the psychological profile of effective leaders and the historical context of the impact their leadership brought to organizations and events Our hope for this book is that these case studies illustrate the basic elements in themselves the very essence of leadership It is through inherent talent arduous preparation and practical experience that we become capable leaders The reader brings the first to the table then we offer a small token in the second pursuit and circumstances enable the third

Resources in Education ,1987 *Democracy and Political Ignorance* Ilya Somin,2016-06-15 One of the biggest problems with modern democracy is that most of the public is usually ignorant of politics and government Many people understand that their votes are unlikely to change the outcome of an election and don t see the point in learning much about politics This creates a nation of people with little political knowledge and little ability to objectively evaluate what they do know The second edition of *Democracy and Political Ignorance* fully updates its analysis to include new and vital discussions on the implications of the Big Sort for politics the link between political ignorance and the disproportionate political influence of the wealthy assessment of proposed new strategies for increasing political knowledge and up to date survey data on political ignorance during recent elections Ilya Somin mines the depths of the current state of ignorance in America and reveals it as a major problem for democracy He weighs various options for solving this problem provocatively arguing that political ignorance is best mitigated and its effects lessened by decentralizing and limiting government People make better decisions when they have stronger incentives to acquire relevant information and to use it wisely
