Economic Downturn and Recovery Teixeira, Nuno Miguel,Lisboa, Inês,2021-06-04 Times of crisis are unexpected and they bring diverse challenges and opportunities for companies financial markets and the economy On one hand more risk and uncertainties appear yet on the other hand it is an opportunity to reorganize and reinvent the company It is important for businesses to understand ways to deal with uncertainty and risk in times of economic downturn and what financial strategies and tools can be used to eliminate or reduce the potential negative effects These effects can reach the company s financial

performance capital structure as well as cause financial debt and the availability of cash flow to companies. However, different financial instruments can sustain the business and deal with the difficulties of payment when sales reduce and uncertainty increases; thus, research is essential in this critical area. When economic downturn affects the financial markets, the role of banks, country dynamics, the economy, and many other facets of the business world, financial management becomes the key for business recovery. The Handbook of Research on Financial Management During Economic Downturn and Recovery shares relevant knowledge on challenges and opportunities caused by crises such as the pandemic and the effects on economic and financial arenas. The chapters cover topics such as business models to understand how companies react to pandemic and crises situations as well as how they change their management and way of conducting business. Other important topics include sustainable development, international financial markets, capital structure changes, uncertainty and risk, and governance and leadership. This book is ideal for shareholders, directors, and managers, economists, researchers, academics, practitioners, stakeholders, researchers, academicians, and students interested in knowledge on topics about challenges in the way that companies, financial markets, financial institutions, and governments respond to risk and uncertainty.
