Changing Gears J. Carlopio, 2003-02-20 Many change management programmes designed to implement new technology are unsuccessful. The author draws upon a number of perspectives in change management and organisational strategy to show that failure is often not to do with technical factors but because of resistance of the workforce. He presents a new approach to implementing technology based upon the persuasion and commitment of the main stakeholders. Carlopio argues that senior managers should take organisational sensitivities and characteristics into account and build a communication and training and development strategy that will support the implementation of change. In this way members of an organisation will be encouraged to embrace the new technology and it will become a part of their corporate mindset. *Handbook of Space Technology* Wilfried Ley, Klaus Wittmann, Willi Hallmann, 2009-03-18 Twenty years since the first edition was published in the German language and just over fifty years since the launch of the Earth's first ever artificial satellite Sputnik 1, this third edition of the *Handbook of Space Technology* presents in fully integrated colour a detailed insight into the fascinating world of space for the first time in the English language.
