The Oxford Handbook of Child Psychological Assessment Donald H. Saklofske, Vicki L. Schwean, Cecil R. Reynolds, 2013-03-20 Psychological assessment has always paralleled the growth of psychology and its specialties and it is not an overstatement to say that measurement and assessment are the cornerstones of psychology

providing the tools and techniques for gathering information to inform our understanding of human behavior. However, the continued growth and new developments in the assessment literature requires an ongoing examination of the principles and practices of central importance to psychological assessment. The Oxford Handbook of Child Psychological Assessment covers all areas of child and adolescent assessment. Leaders in the field summarize and synthesize state of the science assessment theories, techniques, and applications. Placing an emphasis on clinical and psychoeducational assessment issues, chapters explore issues related to the foundations, models, special topics, and practice of psychological assessment. Appropriate as a desk reference or a cover-to-cover read, this comprehensive volume surveys fundamental principles of child assessment, including ability, achievement, behavior, and personality, covers the role of theory and measurement in psychological assessment, and presents new methods and data.

The Routledge International Handbook of Learning Peter Jarvis, Mary H. Watts, 2012. As our understanding of learning focuses on the whole person rather than individual aspects of learning, so the process of learning is beginning to be studied from a wide variety of perspectives and disciplines. This handbook presents a comprehensive overview of the contemporary research into learning; it brings together a diverse range of specialities with chapters written by leading scholars throughout the world from a wide variety of different approaches. The International Handbook of Learning captures the complexities of the learning process in seven major parts. Its 54 chapters are sub-divided in seven parts: Learning and the person; senses, cognitions, emotions, personality traits, and learning styles; Learning across the lifespan; Life-wide learning; Learning across the disciplines, covering everything from anthropology to neuroscience; Meaning; system's interpretation; Learning and disability; Historical and contemporary learning theorists. Written by international experts, this book is the first comprehensive multi-disciplinary analysis of learning, packing a diverse collection of research into one accessible volume.

Academic Motivation and the Culture of Schooling Cynthia Hudley, Adele E. Gottfried, 2008-07-30. Decades of research indicate the important connections among academic motivation and achievement, social relationships, and school culture. However, much of this research has been conducted in homogenous American schools serving middle-class, average-achieving Anglo student populations. This edited volume will argue that school culture is a reflection of the society in which the school is embedded and comprises various aspects, including individualism, competition, cultural stereotypes, and extrinsically guided values and rewards. They address three specific conceptual questions: How do differences in academic motivation for diverse groups of students change over time? How do students' social cognitions influence their motivational processes and outcomes in school? And what has been done to enhance academic motivation? To answer this last question, the contributors describe empirically validated intervention programs for improving academic motivation in students from elementary school through college.
