

Skills – Use $q = mc\Delta T$ to calculate the missing quantity, given the others.

Be sure to show all work required for the following calculations:

9. A 15.75g piece of iron absorbs 1006.75J of heat and its temperature changes from 25 to 175°C. Calculate the specific heat capacity of iron.

10. How many joules of heat are needed to raise the temp. of 10.0g of aluminum from 22 to 55°C, if the specific heat of aluminum is 0.90 J/g°C?

11. To what temperature will a 10.0g piece of glass raise if it absorbs 5275 J of heat and its specific heat capacity is 0.50 J/g°C? The initial temperature of the glass is 20°C.

12. Calculate the specific heat capacity of a piece of wood if 1500.0g of the wood absorbs 6.75x10⁵J, and its temp. changes from 32 to 57°C.

13. 100mL of 4.0°C water is heated until its temp. is 37°C. If the specific heat capacity of water is 4.18 J/g°C, calculate the amount of heat energy needed to cause this rise in temp. in joules AND calories.

14. 25.0g of an unknown substance is heated from 25 to 155°C, absorbing 455J in the process. Calculate the specific heat capacity of the unknown substance. Based on your answer determine the identity of the substance, using the chart on p329 of your text.

Skills – Calculate the enthalpy associated with a reaction.

15. Using the following balanced equation, calculate the thermal energy released (ΔH) when 45.0g of NH_4NO_3 dissolved in water?

16. Calculate the change in enthalpy (ΔH) when 1.00g of hydrogen peroxide decomposes.

Skills – Calculate the energy of a reaction using Hess's Law and identify if it is exothermic or endothermic.

Chapter 1: Introduction to Physical Geography Michael Pidwirny, 2023-06-21 Chapter 1 Introduction to Physical Geography of the eBook Understanding Physical Geography This eBook was written for students

taking introductory Physical Geography taught at a college or university For the chapters currently available on Google Play presentation slides Powerpoint and Keynote format and multiple choice test banks are available for Professors using my eBook in the classroom Please contact me via email at Michael.Pidwirny@ubc.ca if you would like to have access to these resources The various chapters of the Google Play version of Understanding Physical Geography are FREE for individual use in a non classroom environment This has been done to support life long learning However the content of Understanding Physical Geography is NOT FREE for use in college and university courses in countries that have a per capita GDP over 25 000 US dollars per year where more than three chapters are being used in the teaching of a course More specifically for university and college instructors using this work in such wealthier countries in a credit based course where a tuition fee is accessed students should be instructed to purchase the paid version of this content on Google Play which is organized as one of six Parts organized chapters One exception to this request is a situation where a student is experiencing financial hardship In this case the student should use the individual chapters which are available from Google Play for free The cost of these Parts works out to only 0.99 per chapter in USA dollars a very small fee for my work When the entire textbook 30 chapters is finished its cost will be only 29.70 in USA dollars This is far less expensive than similar textbooks from major academic publishing companies whose eBook are around 50.00 to 90.00 Further revenue generated from the sale of this academic textbook will provide the carrot to entice me to continue working hard creating new and updated content Thanks in advance to instructors and students who abide by these conditions IMPORTANT This Google Play version is best viewed with a computer using Google Chrome Firefox or Apple Safari browsers *From Atoms to Galaxies* Sadri Hassani, 2011-06-13

College students in the United States are becoming increasingly incapable of differentiating between proven facts delivered by scientific inquiry and the speculations of pseudoscience In an effort to help stem this disturbing trend *From Atoms to Galaxies A Conceptual Physics Approach to Scientific Awareness* teaches heightened scientific acuity as it educates students about the physical world and gives them answers to questions large and small Written by Sadri Hassani the author of several mathematical physics textbooks this work covers the essentials of modern physics in a way that is as thorough as it is compelling and accessible Some of you might want to know How did Galileo come to think about the first law of motion Did Newton actually discover gravity by way of an apple and an accident Or maybe you have mulled over Is it possible for Santa Claus to deliver all his toys Is it possible to prove that Elvis does not visit Graceland every midnight Or perhaps you've even wondered If ancient Taoism really parallels modern physics If psychoanalysis can actually be called a science How it is that some philosophies of science may imply that a 650 year old woman can give birth to a child No Advanced Mathematics Required A primary textbook for undergraduate students not majoring in physics *From Atoms to Galaxies* examines physical laws and their consequences from a conceptual perspective that requires no advanced mathematics It explains quantum physics relativity nuclear and particle physics gauge theory quantum field theory quarks and leptons and cosmology

Encouraging students to subscribe to proven causation rather than dramatic speculation the book Defines the often obscured difference between science and technology discussing how this confusion taints both common culture and academic rigor Explores the various philosophies of science demonstrating how errors in our understanding of scientific principles can adversely impact scientific awareness Exposes how pseudoscience and New Age mysticism advance unproven conjectures as dangerous alternatives to proven science Based on courses taught by the author for over 15 years this textbook has been developed to raise the scientific awareness of the untrained reader who lacks a technical or mathematical background To accomplish this the book lays the foundation of the laws that govern our universe in a nontechnical way emphasizing topics that excite the mind namely those taken from modern physics and exposing the abuses made of them by the New Age gurus and other mystagogues It outlines the methods developed by physicists for the scientific investigation of nature and contrasts them with those developed by the outsiders who claim to be the owners of scientific methodology Each chapter includes essays which use the material developed in that chapter to debunk misconceptions clarify the nature of science and explore the history of physics as it relates to the development of ideas Noting the damage incurred by confusing science and technology the book strives to help the reader to emphatically demarcate the two while clearly demonstrating that science is the only element capable of advancing technology
