Fact and Fiction in Global Energy Policy Benjamin K. Sovacool, Marilyn A. Brown, Scott V. Valentine, 2016-04-29 A balanced examination of global energy issues Energy sustainability and climate change are two of the greatest challenges facing humankind Unraveling these complex and interconnected issues demands careful and objective assessment Fact and Fiction in Global Energy Policy aims to change the prevailing discourse by examining fifteen core energy questions from a variety of perspectives demonstrating how for each of them no clear cut answer exists Is industry the chief energy villain Can we sustainably feed and fuel the planet at the same time Is nuclear energy worth the risk Should geoengineering be outlawed Touching on pollution climate mitigation and adaptation energy efficiency government intervention and energy security the authors explore interrelated concepts of law philosophy ethics technology economics psychology sociology and public policy This book offers a much needed critical appraisal of the central energy technology and policy dilemmas of our time and the

impact of these on multiple stakeholders **Security in International Climate Policy** Zehra Askinsena Ilkilic, 2024-11-18

The impacts of climate change are increasingly felt worldwide affecting every country regardless of geographical location. Over the past 50 years numerous treaties have been produced that are aimed at combatting climate change. However these international efforts have often been hindered by the actions of great powers prioritising their own interests over global solutions. Since security is one of the most determining factors in states decision making *Security in International Climate Policy* analyses the relationship between states security policies and their efforts against climate change. The book hypothesises that security policies negatively affect measures against climate change. While the security policies of great powers pose a hurdle for a successful climate policy in the first stages of efforts there is a shift in the 21st century when climate change itself begins to threaten the security of states. Based on these findings the author predicts future policy trends and makes policy recommendations.

Responding to Environmental Conflicts: Implications for Theory and Practice Eileen Petzold-Bradley, Alexander Carius, Árpád Vincze, 2012-12-06

A comprehensive tour d horizon of the debate on the environment and security focusing on the various policy options for building peace and preventing environmental conflict. Experts from the areas survey the key environmental challenges in Eastern and Central European states and those of the former Soviet Union extending the debate to such regions as the Balkans the Black Sea and Central Europe. This is the first time such extensive case study research has been reported for these regions. Both practical and theoretical approaches to the debate are presented within a multi disciplinary framework the contributors ranging from academic experts involved with peace and conflict research to actual policy makers active in the fields of environmental and security policy. Readership: Experts already working in the relevant disciplines both academic and governmental as well as those seeking an introduction to the various policy fields. A graduate level study text excellent survey for policy makers and an academic contribution to ongoing studies.

Routledge Handbook of African Security James Hentz, 2013-08-22

This new Handbook examines the issues challenges and debates surrounding the problem of security in Africa. Africa is home to most of the world s current conflicts and security is a key issue. However African security can only be understood by employing different levels of analysis: the individual human security the state national state security and the region regional international security. Each of these levels provides analytical tools for understanding what could be called the African security predicament and these debates are animated by the new security issues: immigration small arms transfers gangs and domestic crime HIV AIDS transnational crime poverty and environmental degradation. African security therefore not only presents concrete challenges for international security but provides a real world context for challenging conventional conceptions of security. Drawing together contributions from a wide range of key thinkers in the field the *Routledge Handbook of African Security* engages with these debates and is organized into four parts: Part I The African security predicament in the twenty first century Part II Understanding conflict in Africa Part III Regionalism and Africa Part IV External influences. This Handbook will be of great

interest to students of African politics human security global security war and conflict studies peacebuilding and IR in general
