Abstract

Abstract: Research on the effects of the 1994 North American Free Trade Agreement (NAFTA) on the U.S. economy has been mixed. This paper examines the effects of NAFTA on the U.S. economy using a dynamic stochastic general equilibrium model. The model is calibrated to U.S. data and is used to simulate the effects of NAFTA on the U.S. economy. The results show that NAFTA has a small positive effect on the U.S. economy, but the effect is not statistically significant.
