Fine Art Printing for Photographers Uwe Steinmueller, Juergen Gulbins, 2013-10-15 Today's digital cameras continue to produce increasingly higher definition image data files making high resolution large format output possible. As printing technology moves forward at an equally fast pace the new inkjet printers are capable of printing with great precision at a very fine resolution providing an amazing tonal range and significantly superior image permanence at a more affordable price. In the hands of knowledgeable photographers these printers are able to produce prints that are comparable to the highest quality darkroom prints on fine art paper. The third edition of this best selling book provides the necessary foundation for successful fine art printing: the understanding of color management, profiling paper and inks. It offers advice on selecting an appropriate printer for long lasting fine art prints, demonstrates how to set up the printing workflow and select a suitable paper for your subject and guides you step by step through the process of converting an image file to an outstanding fine art print. This new edition covers the most recent lines of high end inkjet printers, photo papers and devices for monitor and printer profiling. It also addresses the printing dialogs and some new features of Photoshop CS6. **HWM**, 2005-12

*The Paper Boomerang Book* Mark Latno, 2010-06-01 When it comes to lightweight avionics there's no beating a paper boomerang. Let all the others chase after their dull folded airplanes; you can now build a flying device that comes right back to you every time. And unlike expensive heavy wooden boomerangs you won't endanger windows and skulls with paper boomerangs. *The Paper Boomerang Book* is the first of its kind: guide to this fascinating toy. Expert Mark Latno not only tells you how to build, perfect and troubleshoot your paper boomerang but about the 20,000 year history of the device including Egyptian throwing sticks found in pharaoh's tombs and the physics behind their circuitous flights. And once you've mastered the basic throw, return and catch it's on to more impressive tricks: the Behind the Back Toss, the Boomerang Juggle, the Under the Leg Catch and the dreaded Double Handed Backward Double Boomerang Throw. For those who don't have the luxury of the wide open outback on a clear Australian day, author Latno includes plans for Little Dragons, miniature versions of the paper boomerang that can be used indoors in almost any sized room, rain or shine.
