Anderman, 2013-01-17 The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today There are many often competing claims about how to enhance student achievement raising the questions of What works and What works best World renowned bestselling authors John Hattie and Eric M Anderman have invited an international group of scholars to write brief empirically supported articles that examine predictors of academic achievement across a variety of topics and domains Rather than telling people what to do in their schools and classrooms this guide simply provides the first ever compendium of research that summarizes what is known about the major influences shaping students academic achievement around the world Readers can apply this knowledge base to their own school and classroom settings The 150 entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick easy reference Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries guiding readers to apply this knowledge to their own classrooms their curriculums and teaching strategies and their teacher training programs **Education Reform in the American States** Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates

The Oppositional Culture Theory Paul C.

Mocombe, Carol Tomlin, 2010-10-11 Mocombe and Tomlin explore the black white achievement gap in America and Great Britain gaining understanding through black bourgeois living and the labeled pathologies of the black underclass Within the class dualism of capitalist social relations blacks throughout the Diaspora attempt to exist in the world Furthermore blacks must construct their identities and be in the world by choosing between the discursive practices of the Protestant and capitalist ideology of the black Protestant bourgeoisie or the beliefs of the black underclass which appear to dismiss these

practices as acting white John Ogbu's term. Presently the practical consciousness constituted as hip hop culture of the black underclass supported by finance capital have dominated the American and global social structure and one of its dysfunctions is the black white achievement gap which is a global phenomenon emanating from black America and affecting blacks around the globe. Although the histories of blacks in America and in Great Britain are fundamentally different, Mocombe and Tomlin argue in this work that during the age of globalization the social functions of the dominating black consciousness hip hop culture coming out of America are the locus of causality for the black white achievement gap in America and Great Britain. Tomlin highlights this problematic by analyzing effective strategies employed by high achieving blacks in Great Britain and Mocombe does the same through an analysis of an effective reading curriculum in an American inner city after school program.

Research Supporting Middle Grades Practice David L. Hough, 2010-08-01 Exemplary Middle Grades Research Evidence Based Studies Linking Theory to Practice features research published throughout 2009 in MGRJ that has been identified by our review board as the most useful in terms of assisting educators with making practical applications from evidence based studies to classroom and school settings. The editorial team is pleased to present these studies under one cover, trusting each will contribute to the existing body of knowledge on middle grades education in ways that will enable readers to develop theories more fully and apply findings and implications to a variety of settings. Studies are presented in chronological order as they appeared in each of the four issues published during the fourth volume year 2009. Our first three issues 4.1, 4.2 and 4.3 were special themes wherein guest editors provided the oversight for selection and substantive editorial revisions. Any guest editors' introductory comments regarding previously published manuscripts appear in italics followed by the editor in chief's comments.

The Black/White Academic Achievement Gap and Mocombe's Reading Room Series Curriculum Paul C. Mocombe, 2020-09-04 This work explores the concept of structural reproduction and differentiation through the origins of and basis for Paul C. Mocombe's Mocombeian Strategy 2005 and Reading Room Curriculum published as Mocombe's Reading Room Series 2007. It highlights how black American practical consciousness and the academic achievement gap are a product of capitalist forces, relations of production and their ideological apparatuses. As such, it is argued here that to resolve the gap, black Americans should be treated as immigrant students against their structurally differentiated identities.

Language, Literacy, and Pedagogy in Postindustrial Societies Paul C. Mocombe, Carol Tomlin, 2013 In postindustrial economies such as the United States and Great Britain the black white achievement gap is perpetuated by an emphasis on language and language skills with which black American and black British Caribbean youths often struggle This work analyzes the nature of educational pedagogy in the contemporary capitalist world system under American hegemony Mocombe and Tomlin interpret the role of education as an institutional or ideological apparatus for capitalist domination and examine the sociolinguistic means or pedagogies by which global and local social actors are educated within the capitalist world system to serve the needs of capital i.e. capital accumulation Two specific case studies one in the United States and one in the United Kingdom are utilized to demonstrate how contemporary educational emphasis on language and literacy parallels the organization of work and contributes to the debate on academic underachievement of black students vis a vis their white and Asian counterparts
