Fcc Report And Order Re Amber Alert:

Emergency Alert System (EAS) and All-Hazard Warnings Linda K. Moore, 2011-04 The Emergency Alert System EAS is built on a structure conceived in the 1950s when over the air broadcasting was the best available technology for widely disseminating emergency alerts. It is one of several federally managed warning systems. The NOAA NWS weather radio system has been upgraded to an all-hazard warning capability. The Dept of Homeland Security is implementing a program that will disseminate national alert messages over digital broadcast airwaves using satellite and public TV broadcast towers. This program is called the Integrated Public Alert and Warning System (IPAWS). Contents of this report: EAS Admin NOAA Weather Radio All-Hazard Warning Tech Public Alert Warning System The WARN Act A print on demand report [Oversight of the Federal Communications Commission](#) United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2012 *Mobile Technology and the Transformation of Public Alert and Warning* Hamilton Bean, 2019-10-01 This timely book provides the inside story of the development of mobile public alert and warning technology in the United States and addresses similar systems being used in Australia, Canada, Japan, and the Netherlands. This book provides a comprehensive account of how mobile smartphone systems are transforming the practice of public alert and warning in the United States. Recent events have vaulted mobile alert and warning technology to the forefront of public debates concerning the hazards of the digital age. False alarms of ballistic missile attacks on Hawaii and Japan, the non-use of mobile alerts during the Northern California wildfires, and the role this technology plays in supporting police manhunts and counterterrorism efforts have prompted reconsideration of how these systems are used. Drawing upon interviews with officials, executives, experts, and citizens, the book provides an in-depth analysis of the events and contexts influencing the trajectory of mobile public alert and warning and charts a course for its improvement. The book first introduces readers to the high stakes involved in the transformation of public alert and warning, explaining how new research is revealing the benefits, limitations, and risks of mobile technology in the disaster communication context. Three case studies then illustrate issues of risk, trust, and appropriateness in mobile public alert and warning. **Assuring Public Alert Systems Work to Warn American Citizens of Natural and Terrorist Disasters** United States.
