

MR roadmap: Co-registration of MRI scan with 3D angio data

2D Perfusion high-definition visualizations

#### Confident navigation and device placement

Live Image Guidance is an essential tool for efficient navigation and device placement. Our Roadmap Pro, 3D Roadmap, and MR/CT Roadmap options offer state-of-the-art guidance in 2D and 3D that can save time during procedures. Different clinical modes provide application-specific settings to enhance visualization of challenging devices or materials like ONYX. These tools are equipped with the AlluraClarity's unique automatic motion compensation to keep the Roadmap and live image in sync with each other without any user intervention or changes in the regular workflow.

#### Avoid time-consuming manual pixel shift for archiving

By shifting and rotating pixels on the sub-pixel level automatically during every procedure, AlluraClarity's Automatic Motion Compensation enhances results compared to manual pixel shift. It eliminates the need for manual pixel shift post-processing.

#### Quick post-check in the interventional lab

To save time and unnecessary patient handling, you can use our XperCT scan to do a post procedural check for bleedings while the patient is still on the table. Its enhanced grey scale visualization and more homogeneous images enhance the visualization of soft tissue and small bleedings.
