Thinking with Feeling Douglas P. Newton,2014-03-05 Are emotions good or bad for thinking and learning Have you ever wondered why a good lesson of one year falls flat in another Why do students behave the way they do Teachers are expected to foster productive thought yet the neglect of emotion in the classroom in favour of intellect means teaching and learning is often not as effective as it might be Thinking with Feeling explores what we mean by productive thought its interrelationship with mood and emotions how

teachers can manage that interaction to improve teaching and learning and what teacher trainers could do about it Synthesising the most important international research in the field it offers a framework for productive purposeful thought deduction understanding creative thinking wise thinking and critical thinking and explains how mood and emotion can support and also impede learning It considers the effect of the interplay of emotion and intellect on classroom behaviour on students public performance and performance in tests and how emotional labour can affect the teacher Illustrated with examples from practice this challenging thoughtful study offers education professionals a basis for understanding the interaction of emotions and cognition and making it a successful partnership in order to improve teaching and learning

Drama and Education Manon van de Water, Mary McAvoy, Kristin Hunt, 2015-02-20 Drama and

Education provides a practical comprehensive guide to drama as a tool for teaching and learning. It is among the first practical drama and performance textbooks that address brain based neuroscientific research making the argument that creativity is necessary in our lives that embodied learning is natural and essential and that contextual learning helps us find our place in society in relationship to other peoples and cultures. As well as a historical and theoretical overview of the field it provides rationale and techniques for several specific methodologies: linear drama, process oriented drama, drama for social justice and performance art. Each approach is supplemented with sample lesson plans, activities, ideas for differentiation and extensive bibliographies. The topics are discussed from five key angles: Historical and theoretical foundations, Curricular applications, Practical toolkits for a range of classrooms and learning environments, Different strategies for lesson plans, Extension options for longer workshops. Alongside these core methods the integration of other innovative forms from performance art to Theatre of the Oppressed into drama based learning is explored as well as the pragmatic concerns such as assessment planning and advocacy for arts learning and arts education partnerships. Drama and Education is the comprehensive textbook for teachers and students on Applied Theatre and Theatre and Education courses. **Teacher**

For many years teachers and educators question themselves about their pedagogic method Nevertheless it is possible that the questions one is asking however pertinent may be incomplete in that they only cover one aspect of the entire mechanism involved in the learning process What we realized is that a high percentage of the teaching approaches and consequently their evaluations are essentially cognitive The reason for this is simply because it is said that the learning process is fundamentally cognitive i.e. that it basically lies on activities involving the treatment of information Therefore we can logically conclude that in such instances where a student is struggling to learn the problem must be cognitive in nature In this book we will take a different position or approach By no means do we mean to imply that the approach that looks to cognitive methodology for learning issues is irrelevant but instead we feel that it is insufficient and may not address all of the questions related to the learning process and all of the difficulties attached to it Therefore we will

shift the focus onto a different area of analysis that addresses other parts of the brain themselves linked to the development of emotional skills One of the main objectives of this work is essentially to provide us with primary basic theoretical elements of a new vision on teaching and learning Another logical objective would be to propose tangible and integrated applications of emotional intelligence in our teaching strategies It is precisely for these reasons and many more that this book presents a novel method for understanding learning and teaching processes a method we call emotional pedagogy its premise asserting that one's ability to learn can be directly linked to one's emotional awareness
