**The Burden of Educational Exclusion** ,2010-01-01 School was nothing but a taboo for me concludes Johannah a young South African after recounting her life story Johannah is one of the early school leavers who features in this book Figures on participation in education in Africa show that despite government agreements and policies developed under the banner of Education for All this remains a remote goal In several countries programmes on Universal Primary Education have improved access to education but do those who enter school remain there until they have reached a suitable level Do they acquire enough competences at primary and secondary school to survive the tough daily life in sub Saharan countries What happens to children and young adults who leave school early What measures can be taken to prevent them from doing so This book is based on research carried out in Eastern and Southern Africa by scholars from Africa and the Netherlands who cooperated within the framework of the ESLA project The contributions to this book reflect the exchanges and discussions which took place in this research group initiated by staff of Mzumbe University in Tanzania Uganda Martyrs University and the University of Groningen in the Netherlands The group aims to go beyond figures and uncover the causes effects and stories of the young people involved as well as explore promising new strategies with which to address their needs As early school leaving is not exclusively an African problem a contribution on the Dutch situation is also included The book concludes that exclusion from education has far reaching effects not only for the young people involved but also for the society in which they live The burden of educational exclusion should be the joint responsibility of developing and developed countries The authors hope the book will contribute not only to a greater understanding of the phenomenon of early school leaving but also challenge it in terms of developing policies and programmes that can prevent educational exclusion and support those who already find themselves in such a situation

America and Southeast Asia and the main part of this book is made up by papers dealing with its current distribution discussing ways and means to establish and implement improved control approaches While chemotherapy limits the symptoms caused by schistosomiasis the number of infected people will not decrease until the parasite s life cycle is interrupted To that end some papers focus on the intermediate snail host which is notoriously difficult to control while others discuss human hygiene and sanitation The latter approach not only prevents infection through avoiding people being infected from the snail but more importantly also stops people infecting the snail by leaving contagious feces and urine in nature With morbidity reduced by chemotherapy the immediate target now is the interruption of transmission to be achieved by new tools such as the novel chemotherapies improved diagnostics for humans animals and snails and vaccines discussed in several of the papers As made clear in this book a complex infection requires new tools as well as work on many fronts above all however a clear idea is needed as to how to skillfully combine the tools available and sustain implemented control activities
