## **Grc Capability Model Red Book 2 Thegrcbluebook:**

*GRC Technology Solutions (OCEG Blue Book)* Scott Mitchell, 2013-05-06 The GRC Technology Solutions guide is a model of typical areas where technology is implemented to enhance and enable GRC processes across the organization. It is not intended to include every functionality and capability but to help the IT and business users of the Guide understand at a high level the technology that is available, prioritize the needs of their organization, and start the solution selection process. That selection should always be within the context of the organization's overall IT infrastructure strategy. OCEG will update the Guide on a periodic basis to reflect advances in technology and its use. With an understanding of these relationships, owners of GRC processes and Information Technology professionals can use the Guide to better understand and enable technology support for GRC processes.
