The Eco-Home Design Guide Christopher Day, 2015-10-29 The key principles of designing a pleasant comfortable and healthy eco home with a foreword written by HRH The Prince of Wales now King Charles III Designing an eco home is much more about working with your house's location and situation than relying on intrusive technology and hi tech materials With the soaring energy bills and the climate crisis it is now more important than ever to invest in a home that is considerate of keeping heat in In this handbook architect Christopher Day draws on his extensive experience to explain the key principles of eco home design using common sense methods Packed full of practical information it includes several case studies of eco homes reviewing with hindsight what worked well and what could have been better There is also guidance on how to generate energy upgrading old buildings and site planning With beautifully hand drawn illustrations Christopher

explores how to use local topography combined with landscaping to improve your home's microclimate and keep your house dry and warm in the winter and cool in the summer. There are also handy tips on how to minimise hidden environmental impacts and ideas on ways to make your home a safe and healthy place both emotionally and physically. The Eco Home Design Guide is essential for anyone who wants to create an attractive environmentally friendly home that is in harmony with its location.

Heating, Cooling, Lighting Norbert M. Lechner, Patricia Andrasik, 2021-09-20. The essential guide to environmental control systems in building design. For over 25 years *Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture* has provided architects and design professionals the knowledge and tools required to design a sustainable built environment at the schematic design stage. This Fifth Edition offers cutting edge research in the field of sustainable architecture and design and has been completely restructured based on net zero design strategies. Reflecting the latest developments in codes, standards and rating systems for energy efficiency, *Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture* includes three new chapters: *Retrofits*, *Best practices for efficient energy optimization in existing buildings*, *Integrated Design Strategies for synergizing passive and active design*. *Design Tools*: How to utilize the best tools to benchmark a building's sustainability and net zero potential. *Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture* is a go-to resource for practicing professionals and students in the fields of environmental systems technology or design, environmental design systems, construction technology and sustainability technology.

Heating, Cooling, Lighting Norbert Lechner, 2014-10-13. Sustainable environmental control through building design. *Heating Cooling and Lighting* is the industry standard text on environmental control systems with the emphasis on sustainable design. By detailing the many factors that contribute to the comfort in a building, this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating, cooling and lighting. This new fourth edition includes new information on integrated design strategies and designing for the Tropics. Resources include helpful case studies, checklists, diagrams and a companion website featuring additional cases, an image bank and instructor materials. Designing buildings that require less energy to heat, cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems. Basic design decisions regarding size, orientation and form have a great impact on the sustainability, cost and comfort of a building. *Heating Cooling and Lighting* provides detailed guidance for each phase of a design project. Readers will Understand the concept of sustainability as applied to energy sources. Review the basic principles of thermal comfort and the critical role of climate. Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics. Discover how siting, architectural design and landscaping can reduce the requirements for mechanical and electrical systems. In sustainable design, mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself. With this in mind, designers require a comprehensive

understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control The Container Tree Nursery Manual: Atmospheric environment ,1990 **The Container Tree Nursery Manual** ,1995
