The Multi-age Learning Community in Action Barbara Cozza, 2017-09-18 As schools struggle to teach all students the multi age teaching and learning framework has emerged as one of today s most effective ways to structure schools Multi age Learning Community MAC Program is a professional development program in action It presents a framework that can transform schools from a graded system to a multi age learning environment This multi age school targets students individual and personal needs and allows students to excel and succeed The school reform climate today focuses on schools of choice and building effective school environments This multi age program creates a unique school niche that is marketable to families Parents have the option of sending their children to schools that concentrate on achievement that best meets the needs of the learner without disrupting the mandates of the curricula This book is intended to assist educators at all levels of all school organizations as well as give policymakers educators and parents the information on an effective school program This book gives information on how to transform schools into multi age classrooms This book is divided into four parts that explain both the theory and the practice of effective strategies for the multi age school program Organizational Practice Building Culture Learning Processes and Assessment and Systemic Improvement There are specific basic principles and practices that are integrated into a quality and effective framework discussed in the chapters of this book Each chapter begins with a vignette based on my experiences in multiage schools and concludes with an educator s reflection to recap the concepts in the chapter Each chapter also integrates snapshots that are short real to life passages that bring to life concepts discussed in the chapter Although this book discusses multi age schools these ideas may be applied to all school environments To accommodate all school programs at the end of each chapter a section titled Application for All Schools is a framework that discusses just how to apply chapter concepts in any school or classroom program It is recommended that the reader review the book one time in sequence and then reread each chapter as needed to give meaning to the reader s purpose

Elementary Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong

Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one

another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors *New South Wales Targeting Maths* Gloria Harris,Garda Turner,2003 **NSW Targeting Maths.
