The Art of Grief J. Earl Rogers,2011-02-10 Art and other expressive therapies are increasingly used in grief counseling not only among children and adolescents but throughout the developmental spectrum Creative

activities are commonly used in group and individual psychotherapy programs but it is only relatively recently that these expressive modalities have been employed within the context of clinical grief work in structured settings. These forms of nonverbal communication are often more natural ways to express thoughts and feelings that are difficult to discuss, particularly when it comes to issues surrounding grief and loss. Packed with pictures and instructional detail, this book includes an eight-session curriculum for use with grief support groups as well as alternative modalities of grief art therapy.

Settling the Storm: A Guide to Facilitating Grief Groups, 2011-04-23

Technically, there are two types of grief groups. The informative/supportive grief groups' purpose is to promote grief education and awareness. It covers grief and bereavement in a more didactic fashion. The second type of grief group is therapeutic in nature. It is personal growth oriented, focusing on facilitating the individual participant's own personal loss process. Though many commonalities exist between these two types of groups, each has its own unique dynamics and concerns. This book focuses on the second type of group, sometimes referred to as Grief Recovery Groups. I prefer the term Grief Management. I learned a long time ago that there is no recovery from grief precipitated by the loss of a beloved, but we can overcome. *Settling the Storm* is particularly designed for all who are currently leading a group, who are thinking about facilitating a grief group in the future, or would like to learn some additional skills or ideas in creating a grief group within a small gathering of people. It was created and organized to help facilitators plan and facilitate grief groups. It takes off by inviting you to self-assess readiness to lead grievers on the journey through grief, reviews the typical characteristics of effective facilitators, and accentuates the vital skills necessary for ensuring positive outcomes. The next chapter moves you on to a refresher glance at the anatomy of grief and bereavement by considering elements that influence grief, explores the categories of grief, and discusses issues relative to grief of the elderly. The third section focuses on the essentials for group preparation and helps you organize your thoughts and ideas about groups. The practical aspects of goals and objectives and other information are included to provide you with an adequate blueprint for the implementation of your first group session. The Content of the Session provides you with some thoughts and suggestions on what to do in your grief groups. In addition, setting up group guidelines, structuring cathartic activities, and evaluating the group process are also covered. You will be given tried and proven methodologies used to promote the emotional and spiritual well-being of grieving group members and fundamental tools needed for ensuring the best possible results. A grief group curriculum that can be used as a model is integrated into the overall presentation. Optional resources are appended.

Supporting Pet Owners Through Grief Ryane E. Englar, Jill Englar, Teresa Graham Brett, 2023-10-31 An empathic and emotional exploration of the inevitable subject of grief that veterinarians will regularly encounter throughout their relationships with clients on their journey through the care and management of animal patients. The authors take an informed and supportive look at the philosophical and psychological impacts of grief, emphasizing the individual experiences of clients while also addressing the impacts on the veterinarian and veterinary team. Chapters cover the importance of the human-animal bond, unique circumstances relating to grief, practical tool kit approaches that help the vet work alongside the client in a way that is supportive and practically helpful, self-management resources for a veterinary-centric view of managing the process of euthanasia, death, and grief. *Supporting Pet Owners Through Grief* provides practitioners and students alike with tools to better understand grief and its impact on the human-animal bond. Veterinary team members will also learn how to navigate their own mix of emotions as they themselves experience and process recurrent grief that can contribute to compassion fatigue and burnout. 5m Books
