The Wide Lens in Archaeology Allan Gilbert,Justin Lev-Tov,Paula Wapnish,2017-06-01 This book honors the memory of Brian Hesse a scholar of Near Eastern archaeology a writer of alliterative and punned publication titles and an accomplished amateur photographer Hesse specialized in zooarchaeology but he influenced a wider range of excavators and ancient historians with his broad interpretive reach He spent much of his career analyzing faunal materials from different countries in the Middle East including Iran Yemen and Israel and his publications covered themes particular to animal bone studies such as domestication ancient market economics as well as broader themes such as determining ethnicity in archaeology The essays in this volume reflect the breadth of his interests Most chapters share an Old World geographic setting focusing either on Europe or the Middle East The topics are diverse with the majority discussing animal bones as was Hesse's specialization but some take a nonfaunal perspective related to the problems with which Hesse grappled The volume is also broad in temporal scope ranging from Neolithic Iran to early Medieval England and it addresses theoretical matters as well as methodological innovations including taphonomy and the history of computers in zooarchaeology Several of the essays are direct revisits to inspirations from or extensions of Hesse's own research All the contributions reflect his intense interest in social questions about antiquity the theme of social archaeology informed much of Brian Hesse's thinking and it is why his work made such an impact on those working outside his own disciplinary research

Grammar and Dictionary (2 Vols.) Franklin Edgerton, This is the first attempt at a description of the grammar and lexicon of Buddhist Hybrid Sanskrit Most North Indian Buddhist texts are composed in it It is based primarily on an old Middle Indic vernacular not otherwise identifiable But there seems reason to believe that it contains features that were borrowed from other Middle Indic dialects In other words even its Middle Indic aspects are dialectically somewhat mixed Most strikingly however BHS was also extensively influenced by Sanskrit from the very beginning of the tradition as it has been transmitted to us and increasingly as time went on Many especially later products of this tradition have often though misleadingly been called simply Sanskrit without qualification In principle the author has excluded from the grammar and dictionary all forms which are standard Sanskrit and all words which are used in standard Sanskrit with the same meanings

Ceramics and Change in the Early Bronze Age of the Southern Levant Graham Philip,Douglas Baird,2000-12-01 This book sets out the primary issues and current debates in the use of ceramics to reconstruct and explain cultural economic and social processes in the Early Bronze age By bringing together research on pottery from various parts of the southern Levant it allows direct comparison of contemporary material from different regions Alongside these empirical studies are discussions of general ceramic issues so that the book highlights the potential of pottery as an investigative tool and indicates fruitful directions for future research within the traditionally conservative field of Levantine archaeology
