Shively endured brutal treatment at the hands of the enemy in Hanoi prison camps. Back home his girlfriend moved on and married another man. Bound in iron stocks at the Hanoi Hilton, unable to get home to his loved ones, Shively contemplated suicide. Yet somehow he found hope and the will to survive, and he became determined to help his fellow POWs. In a newspaper interview several years after his release, Shively said, "I had the opportunity to be captured, the opportunity to be interrogated, the opportunity to be tortured, and the experience of answering questions under torture. It was an extremely humiliating experience. I felt sorry for myself. But I learned the hard way: life isn't fair. Life is only what you make of it." Written by Shively's stepdaughter, Amy Hawk, whose mother, Nancy, ultimately reunited with and married Shively in a triumphant love story, and based on extensive audio recordings and Shively's own journals, *Six Years in the Hanoi Hilton* is a haunting, riveting portrayal of life as an American prisoner of war trapped on the other side of the world.

Defining Student Success Lisa M. Nunn, 2014-04-15. The key to success, our culture tells us, is a combination of talent and hard work. Why, then, do high schools that supposedly subscribe to this view send students to college at such dramatically different rates? Why do students from one school succeed while students from another struggle? To the usual answer—an imbalance in resources—this book adds a far more subtle and complicated explanation. *Defining Student Success* shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed: ideas that do more to preserve the status quo than to promote upward mobility. Lisa Nunn's study of three public high schools reveals how students' beliefs about their own success are shaped by their particular school environment and reinforced by curriculum and teaching practices. While American culture broadly defines success as a product of hard work or talent, at school intelligence is the talent that matters most. Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way, reflecting the sensibilities and concerns of the people who inhabit each school. While one school fosters the belief that effort is all it takes to succeed, another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts. Ultimately, Nunn argues that these school-level adaptations of cultural ideas about success become invisible advantages and disadvantages for students' college-going futures. Some schools' definitions of success match seamlessly with elite college admissions' definition of the ideal college applicant, while others more closely align with the expectations of middle or low-tier institutions of higher education. With its insights into the transmission of ideas of success from society to school to student, this provocative work should prompt a reevaluation of the culture of secondary education. Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure.
