SHOULDING A Story of Resilience and Hope is my journey from being a child abuse and domestic abuse survivor to the happy healthy person I am today Each chapter takes the reader through the events of my dysfunctional relationships and how that dysfunction impacted every aspect of my life I suffered through agoraphobia anxiety obsessive compulsive disorder and post traumatic stress disorder At age 51 I got the final piece of the puzzle that set me free and led me to emotional and mental health I was raised in a middle class Jewish home in Minneapolis Minnesota No one had any idea what was going on behind closed doors Honestly I don t think I understood the gravity of what was happening I just thought everyone got beaten

up at home I have spent years in therapy trying to understand my life I can proudly say that agoraphobia is no longer an issue My anxiety obsessive compulsive disorder and post traumatic stress disorder are minimal so I believe I have won the battle Writing my autobiography memoir was daunting to say the least My writing style is conversational as if I m having coffee with my reader I think with my relaxed writing style and the humor I include which is my greatest coping skill I hope that the reader will understand their own similar circumstances and maybe even try some of the things that have helped me through some of the toughest parts of my life For me the goal of THE SHOULDING A Story of Resilience and Hope is to help others

Language, Discourse and Anxiety Luke Collins,Paul Baker,2023-06-22 Why is language so important to the ways that we make sense of anxiety This book uses corpus assisted discourse analysis to examine twenty three million words of text posted to a forum for people with anxiety It shows how linguistic techniques like catastrophisation and anthropomorphisation can result in very different conceptualisations of anxiety as well as how aspects of identity like age sex and cultural background can impact on understandings of anxiety and how it ought to be managed It tracks the changing identities of posters from their first posts to their last and incorporates a range of corpus based techniques to examine the language data enabling consideration of interaction between participants and features associated with online forms of communication like emoji It ultimately provides a step towards a better understanding of different responses to anxiety and aims to promote further engagement with this topic in the field of applied linguistics
