

Network Services Detailed Vulnerability Summary

This chapter reports the number of systems on which the technology has been located in terms of critical, high, and medium vulnerabilities. The tables display the total number of identified vulnerabilities, including the associated repository, CVE, NessusID, MAC address, and IP address of the vulnerable systems for each network services vendor. Each element in this chapter provides detailed information about network service vulnerabilities that could impact critical systems and services within the organization. The chapter element uses the Common Platform Enumeration (CPE) filter to identify many of the software programs used for network services. Where appropriate, regex is utilized to assist in locating the relevant CPE network service identifiers.
