Web Database Applications with PHP and MySQL Hugh E. Williams, David Lane, 2004-05-13 There are many reasons for serving up dynamic content from a web site to offer an online shopping site create customized information pages for users or just manage a large volume of content through a database Anyone with a modest knowledge of HTML and web site management can learn to create dynamic content through the PHP programming language and the MySQL database This book gives you the background and tools to do the job safely and reliably Web Database Applications with PHP and MySQL Second Edition thoroughly reflects the needs of real world applications It goes into detail on such practical issues as validating input do you know what a proper credit card number looks like logging in users and using templates to give your dynamic web pages a standard look But this book goes even further It shows how JavaScript and PHP can be used in tandem to make a user's experience faster and more pleasant It shows the correct way to handle errors in user input so that a site looks professional It introduces the vast collection of powerful tools available in the PEAR repository and shows how to use some of the most popular tools Even while it serves as an introduction to new programmers the book does not omit critical tasks that web sites require For instance every site that allows updates must handle the possibility of multiple users accessing data at the same time This book explains how to solve the problem in detail with locking Through a sophisticated sample application Hugh and Dave's Wine Store all the important techniques of dynamic content are introduced Good design is emphasized such as

dividing logic from presentation The book introduces PHP 5 and MySQL 4.1 features while providing techniques that can be used on older versions of the software that are still in widespread use This new edition has been redesigned around the rich offerings of PEAR Several of these including the Template package and the database independent query API are fully integrated into examples and thoroughly described in the text Topics include Installation and configuration of Apache MySQL and PHP on Unix Windows and Mac OS X systems Introductions to PHP SQL and MySQL administration Session management including the use of a custom database for improved efficiency User input validation security and authentication The PEAR repository plus details on the use of PEAR DB and Template classes Production of PDF reports **XML and Web**

Technologies for Data Sciences with R Deborah Nolan, Duncan Temple Lang, 2013-11-29 Web technologies are increasingly relevant to scientists working with data for both accessing data and creating rich dynamic and interactive displays The XML and JSON data formats are widely used in Web services regular Web pages and JavaScript code and visualization formats such as SVG and KML for Google Earth and Google Maps In addition scientists use HTTP and other network protocols to scrape data from Web pages access REST and SOAP Web Services and interact with NoSQL databases and text search applications This book provides a practical hands on introduction to these technologies including high level functions the authors have developed for data scientists It describes strategies and approaches for extracting data from HTML XML and JSON formats and how to programmatically access data from the Web Along with these general skills the authors illustrate several applications that are relevant to data scientists such as reading and writing spreadsheet documents both locally and via Google Docs creating interactive and dynamic visualizations displaying spatial temporal displays with Google Earth and generating code from descriptions of data structures to read and write data These topics demonstrate the rich possibilities and opportunities to do new things with these modern technologies The book contains many examples and case studies that readers can use directly and adapt to their own work The authors have focused on the integration of these technologies with the R statistical computing environment However the ideas and skills presented here are more general and statisticians who use other computing environments will also find them relevant to their work Deborah Nolan is Professor of Statistics at University of California Berkeley Duncan Temple Lang is Associate Professor of Statistics at University of California Davis and has been a member of both the S and R development teams **The Definitive Guide to Supply**
