An Introduction to Energy Efficiency for Buildings J. Paul Guyer, P.E., R.A., Introductory technical guidance for professional engineers and others interested in energy efficient design of buildings Here is what is discussed 1 HVAC SYSTEM UPGRADES 2 HVAC CONTROLS 3 LIGHTING UPGRADES 4 AIR DISTRIBUTION UPGRADES 5 ENERGY EFFICIENCY FOR DATA CENTERS 6 SOLAR COLLECTORS 7 PASSIVE SOLAR HEATING 8 SOLAR WATER HEATING FUNDAMENTALS 9 SOLAR COOLING SYSTEMS Building Performance Simulation for Design and Operation Jan L.M. Hensen,Roberto Lamberts,2012-09-10 Effective building performance simulation can reduce the environmental impact of the built environment improve indoor quality and productivity and facilitate future innovation and technological progress in construction It draws on many disciplines including physics mathematics material science biophysics and human behavioural environmental and computational sciences The discipline itself is continuously evolving and maturing and improvements in model robustness and fidelity are constantly being made This has sparked a new agenda focusing on the effectiveness of simulation in building life cycle processes Building Performance Simulation for Design and Operation begins with an introduction to the concepts of performance indicators and targets followed by a discussion on the role of building simulation in performance based building design and operation This sets the ground for in depth discussion of performance prediction for energy demand indoor environmental quality including thermal visual indoor air quality and moisture phenomena HVAC and renewable system performance urban level modelling building operational optimization and automation Produced in cooperation with the International Building Performance Simulation Association IBPSA and featuring contributions from fourteen internationally recognised experts in this field this book provides a unique and comprehensive overview of building performance simulation for the complete building life cycle from conception to demolition It is primarily intended for advanced students in building services engineering and in architectural environmental or mechanical engineering and will be useful for building and systems designers and operators **Advanced Controls for Intelligent Buildings** Siddharth Goyal,2021-07-04 This book focuses primarily on both technical and business aspects needed to select design develop and deploy control application or product successfully for multiple components in building systems Designing and deploying a control application require multiple steps such as sensing system dynamics modelling algorithms and testing This may involve choosing an appropriate methodology and technique at multiple stages during the development process Understanding the pros and cons of such techniques most importantly being aware of practically possible approaches in the entire ecosystem is critical in choosing the best framework and system application for different parts of building systems Providing a wide overview of the state of art in controls and building systems providing guidance on developing an end to end system in relation to business fundamentals distribution channels stakeholders marketing supply chain and financial management the book is ideal for fourth year control mechanical electrical engineering undergraduates graduate students

and practitioners including business leaders concerned with smart building technology Renewable Energy Integration with Building Energy Systems V.S.K.V. Harish,Amit Vilas Sant,Arun Kumar,2022-07-19 Construction as an industry sector is responsible for around one third of the total worldwide energy usage and about 20% of greenhouse gas emissions The rise in the number of buildings and floor space area for residential and commercial purposes has imposed enormous pressure on existing energy sources Implementations such as efficient usage of building energy systems design measures utilization of local energy resources energy storage and the use of renewable energy sources to meet electricity demands are currently under development and deployment for improving the energy performance index However integrating all such measures and the development of nearly zero energy and zero emission buildings is yet to be explored In this book the different control techniques and intelligent technologies used to improve the energy performance of buildings are illustrated Every building energy control system has a two fold objective for energy and comfort requirements to achieve a high comfort index for thermal visual air quality humidity and various plug loads and increase the energy performance index The most significant aspect in the design of a building s energy control system is modelling All the components methodologies and processes involved in developing a renewable energy driven building are covered in detail This book is intended for graduates and professionals working towards the development of a sustainable built environment using renewable energy sources

Industrial Energy Systems Handbook A.E. Williams,2023-01-27 Industrial Energy Systems Handbook is a supplementary reading resource for candidates undertaking the Association of Energy Engineers AEE Certified Industrial Energy Professional CIEP program Understanding how the various industrial systems work is key to identifying savings opportunities An overview is given of the global energy situation as at the time of publication which cements the necessity to improve energy intensive processes to become more optimized Comprehension of opportunities to optimize an industrial energy system starts with the fundamentals of energy electrical energy and thermal energy and the importance of energy management systems and industrial energy audits The main energy consuming systems in industry are covered such as steam compressed air motors drives fans pumps lighting furnaces heat exchange systems and large scale cooling and industrial refrigeration The instrumentation and control as well as toolkits available rounds off the handbook topics

CONTROL SYSTEMS, ROBOTICS AND AUTOMATION - Volume Heinz D. Unbehauen,2009-10-11 This Encyclopedia of Control Systems Robotics and Automation is a component of the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This 22 volume set contains 240 chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It is the only publication of its kind carrying state of the art knowledge in the fields of Control Systems Robotics and Automation and is aimed by virtue of the several applications at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs *Controls and Automation for Facilities*

Managers Viktor Boed, 1998-06-23 Building owners and managers expect fully automated and energy efficient operations on line diagnostic of systems parameters to prevent failures and on line diagnostic of problems prior to exposing occupants to deteriorating environmental conditions A simple HVAC control is no longer acceptable by current standards Controls and Automation for Facilities Managers examines principles and applications of HVAC engineering outlining information for design development of operations logic systems diagnostics and building of environmental conditions with reliability and minimum operating cost The book moves from the principles of mechanical engineering related to HVAC systems through DDC applications engineering thereby summarizing complex topics of electrical engineering for mechanical engineers Individual chapters Provide essential information on related mechanical HVAC engineering controls strategies and examples of basic algorithms for on line diagnostics Guide DDC application engineers to a more thorough understanding of mechanical engineering disciplines i e the psychrometric chart as well as guide mechanical engineers to a more thorough understanding of DDC applications engineering i e direct digital controllers and systems Outline information on current topics Discussions also include Indoor air quality presenting material for facilities engineers as well as controls and consulting engineers Utilities metering describing the distribution of real time data over a network including consumption alarms diagnostics trends and reports On line problem diagnostics outlining HVAC and environmental problems Controls and Automation for Facilities Managers serves as an exceptional guide for facilities managers and engineers architects and consulting engineers vendors and contractors and other professionals in the design application and implementation of controls and automation systems for industrial educational institutional and governmental facilities This reference will enhance design systems implementation systems operation and maintenance effecting the ultimate goal of its readers implementation of fully automated environmental control systems trouble free operation and optimization of operating and maintenance cost
