- (10 points) Using the data that you collected for the assignment on describing data, determine if there is a significant difference in the distance between the tips of the horns between the barchans from Namibia in Peru. Use the student's t-test (assuming unequal variance) and an $\alpha = 0.05$. Report the following values: p-value (two tailed), test statistic, and critical test statistic. Is there a significant difference between the barchans from the two regions?

Solution:
