Identification and Citizenship in Africa Séverine Awenengo Dalberto, Richard Banégas, 2021-05-09 In the context of a global biometric turn this book investigates processes of legal identification in Africa from below asking what this means for the relationship between citizens and the state Almost half of the population of the African continent is thought to lack a legal identity and many states see biometric technology as a reliable and efficient solution to the problem However this book shows that biometrics far from securing identities and avoiding fraud or political distrust can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging It highlights the social and political embedding of legal identities and the resilience of the documentary state Drawing on empirical research conducted across 14 countries the book documents the processes practices and meanings of legal identification in Africa from the 1950s right up to the biometric boom Beyond the classic opposition between surveillance and recognition it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work the practices of citizenship and the role of bureaucracy in the writing of the self in African societies This book will be of an important reference for students and scholars of African studies politics human security and anthropology and the sociology of the state

Identity Card Technologies Great Britain: Parliament: House of Commons: Science and Technology Committee, 2006-08-04 This report focuses upon the Home Office's identity cards scheme which uses various technologies including biometrics information and communication technology ICT and smart cards It explores the ways in which scientific advice risk and evidence are being managed in relation to technologies that are continually developing The Home Office has followed good practice by the establishment of advisory committees the use of Office of Government Commerce OGC Gateway Reviews and the development of risk management strategies along with a policy of gradual implementation But the Committee has identified weaknesses in the use of scientific advice and evidence There has been a lack of transparency surrounding the incorporation of scientific advice the procurement process and the ICT system Consultations have been limited in scope and their objectives have been unclear Only some aspects of the scheme such as the biometrics have been determined The Home Office's decisions demonstrate an inconsistent approach to scientific evidence and the Committee is concerned that choices regarding biometric technology have preceded trials With extensive trialling still to take place the Committee is sceptical about the validity of projected costs The Committee recommends that the Home Office seeks advice on ICT from senior and experienced professionals and establishes an ICT assurance committee It is crucial that the Home Office increases clarity and transparency across the programme not only in problem areas The programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions My

Avatar, My Self Zach Waggoner, 2014-01-10 With videogames now one of the world's most popular diversions the virtual world has increasing psychological influence on real world players This book examines the relationships between virtual and non virtual identity in visual role playing games Utilizing James Gee's theoretical constructs of real world identity virtual world identity and projective identity this research shows dynamic varying and complex relationships between the virtual avatar and the player's sense of self and makes recommendations of terminology for future identity researchers **Ten**

Lessons in Theory Calvin Thomas, 2013-08-01 An introduction to literary theory unlike any other Ten Lessons in Theory engages its readers with three fundamental premises The first premise is that a genuinely productive understanding of theory depends upon a considerably more sustained encounter with the foundational writings of Hegel Marx Nietzsche and Freud than any reader is likely to get from the introductions to theory that are currently available The second premise involves what Fredric Jameson describes as the conviction that of all the writing called theoretical Lacan's is the richest Entertaining this conviction the book pays more and more careful attention to the richness of Lacan's writing than does any other introduction to literary theory The third and most distinctive premise of the book is that literary theory isn't simply theory about literature but that theory fundamentally is literature after all Ten Lessons in Theory argues and even demonstrates that theoretical writing is nothing if not a specific genre of creative writing a particular way of engaging in the art of the sentence the art of making sentences that make trouble sentences that make or desire to make radical changes in the very fabric of social reality As its title indicates the book proceeds in the form of ten lessons each based on an axiomatic sentence selected from the canon of theoretical writing Each lesson works by creatively unpacking its featured sentence and exploring the sentence's conditions of possibility and most radical implications In the course of exploring the conditions and consequences of these troubling sentences the ten lessons work and play together to articulate the most basic assumptions and motivations supporting theoretical writing from its earliest stirrings to its most current turbulences Provided in each lesson is a working glossary specific critical keywords are boldfaced on their first appearance and defined either in the text or in a footnote But while each lesson constitutes a precise explication of the working terms and core tenets of theoretical writing each also attempts to exemplify theory as a practice of creativity Foucault in itself **Human Growth and**
