Ios 703 Problems:

The Problem of Herbal Medicines Legal Status José Luis Valverde, 1999 The main problem in the use of medicinal plants discussed in this book is that citizens are being persuaded that herbal medicine is based on its low or even absent toxicology A good efficacy is assumed as self evident and therapeutic benefit without risks is expected Many users prefer natural medicine instead of synthetic remedies However the number of reports on unwanted side effects of phytomedicines increased in the last years In some instances a lack of pharmaceutical quality was found The unqualified recommendation of herbal medicines may represent a considerable risk to the user The use of a herbal remedy with unproven efficacy can represent a risk for the user when a more effective and necessary treatment will therefore be stopped or omitted These circumstances must be taken into account by the governments inspection services the doctors and the judges The present approach to herbal medicines and fraud with these products do not receive the necessary punishment because it is believed that if the product does not have any therapeutic property it cannot entail any harm either
