Strauss,2015-05-19 Territorial Leasing in Diplomacy and International Law focuses on an unexplored but relatively common practice in which states reallocate their rights on territory without altering formal boundaries or resorting to definitive cessions As products of diplomacy leases address a frequent situation that in extreme cases can lead to war the desire by more than one state to exercise sovereign authority in the same place As instruments of international law they paradoxically reinforce the territorial integrity of states while raising questions about the nature of their sovereignty This book draws from a large number of leases to examine the practice from historic to modern times describing their elements in detail and assessing them from both political and legal perspectives Graphene-based Nanotechnologies for Energy and Environmental Applications Mohammad Jawaid,Akil Ahmad,David Lokhat,2019-08-02

Graphene Based Nanotechnologies for Energy and Environmental Applications explores how graphene based materials are being used to make more efficient reliable products and devices for energy storage and harvesting and environmental monitoring and purification The book outlines the major sustainable recyclable and eco friendly methods for using a range of graphene based materials in innovative ways It represents an important information source for materials scientists and engineers who want to learn more about the use of graphene based nanomaterials to create the next generation of products and devices in energy and environmental science Graphene based nanotechnologies are at the heart of some of the most exciting developments in the fields of energy and environmental research Graphene has exceptional properties which are being used to create more effective products for electronic systems environmental sensing devices energy storage electrode materials fuel cell novel nano sorbents membrane and photocatalytic degradation of environmental pollutants especially in the field of water and wastewater treatment Covers synthesis preparation and application of graphene based nanomaterials from different sources Demonstrates systematic approaches to the design synthesis characterization and applications of graphene based nanocomposites in order to establish their important relationship with end user applications Discusses the challenges in ensuring reliability and scalability of graphene based nanotechnologies *The Governance of Agriculture in Post-Brexit UK*

Irene Antonopoulos,Matt Bell,Aleksandra Čavoški,Ludivine Petetin,2022-02-27 This book provides a multidisciplinary analysis of the impact of Brexit on British agriculture and associated areas discussing the Common Agricultural Policy and the Agriculture Act 2020 The Brexit referendum provoked new debates and questions over the future of agriculture in Britain and the potential positive and negative impacts of Brexit on both farmers and consumers These debates as well as the ensuing proposals relevant to the Agriculture Act 2020 have exposed the multidimensional effects of Brexit when it comes to agriculture With a focus on profitability the rights of farmers environmental protection as well as animal welfare this book brings together an interdisciplinary analysis of the future of British agriculture in post Brexit Britain More specifically it

addresses the criticisms over the Common Agriculture Policy presents an analysis of the Agriculture Act 2020 and considers suggestions for future developments Through this analysis the book suggests a way towards the future with a positive outlook towards a competitive and sustainable agriculture that will satisfy the needs of farmers and consumers while ensuring environmental protection animal welfare and rural development This book will be of great interest to students and scholars of food and agricultural policy and politics agroecology and rural development as well as policymakers involved in Britain's post Brexit environmental policy *Storying the Public Intellectual* Pat Sikes,Yvonne Novakovic,2019-10-17

Storying the Public Intellectual Commentaries on the Impact and Influence of the Work of Ivor Goodson offers a critical commentary on Goodson's work that avoids hagiography whilst recognising the global reach of his scholarship With contributors from around the world those who have collaborated with him or those who have taken up his work the book provides the sort of social and historical contextualising that Goodson has always advocated The accounts in this collection highlight how Goodson's integration of moral imperatives into strategically responsive scholarship can provide a useful roadmap when negotiating a path through the contemporary academic research landscape By using his historian's orientation and sensibilities he is able to get to the heart of the logics of schooling By connecting with other scholars and researchers around the world he exposes how the global neo liberal project plays out in particular settings and so challenges pervasive understandings about the meaning of global and the power of the neo liberal project itself This book is ideal reading for academics scholars and researchers in the field of education including those involved in initial and in service teacher education *Nuclear Magnetic Resonance* Krystyna Kamienska-Trela,2015-05-20 Applications of nuclear magnetic

resonance span a wide range of scientific disciplines from physics to medicine This series has provided an essential digest of the NMR literature for more than four decades and each volume provides unrivalled coverage of the literature on this topic Continuous coverage on some topics such as theoretical and physical aspects of nuclear shielding is balanced by the desire for coverage on newer topics like applications in biological systems and materials science For those wanting to become rapidly acquainted with NMR or seasoned practitioners this is an invaluable source of current methods and applications *The Routledge Companion to Humanitarian Action* Roger Mac Ginty,Jenny H Peterson,2015-03-24 The Companion on Humanitarian Action addresses the political ethical legal and practical issues which influence reactions to humanitarian crisis It does so by exploring the daily dilemmas faced by a range of actors including policy makers aid workers the private sector and the beneficiaries of aid and by challenging common perceptions regarding humanitarian crisis and the policies put in place to address these Through such explorations it provides practitioners and scholars with the knowledge needed to both understand and improve upon current forms of humanitarian action The Companion will be of use to those interested in a range of humanitarian programmes ranging from emergency medical assistance military interventions managing refugee flows and the implementation of international humanitarian law As opposed to addressing specific programmes it will explore five

themes seen as relevant to understanding and engaging in all modes of humanitarian action The first section explores varying interpretations of humanitarianism including critical historical and political economic explanations as well as more practice based explorations focused on notions needs assessments and evaluation Following this readers will be exposed to the latest debates on a range of humanitarian principles including neutrality and sovereignty before exploring the key issues faced by the main actors involved in humanitarian crisis from international NGOs to local community based organizations The final two sections address what are seen as key dilemmas in regards to humanitarian action and emerging trends in the humanitarian system including the increasing role of social media in responding to crises Whilst not a how to guide the Companion contains many practical insights for policy makers and aid workers whilst also offering analytical insights for students of humanitarian action Indeed throughout the book readers will come to the realization that understanding and improving humanitarian action simultaneously requires both active critical reflection and an acceptance of the urgency and timeliness of action that is required for humanitarian assistance to have an impact on vital human needs Exploring a sector that is far from homogenous both practitioners and scholars alike will find the contributions of this book offers them a deeper understanding of the motivations and mechanics of current interventions but also insight into current changes and progress occurring in the field of humanitarian practice
